Select the music of your choice – MP 22 two zone music player

AMC Baltic expands the range of its professional music players with MP 22 – a cost effective two-zone music source with flexible signal routing and paging capabilities.

MP 22 is a two-zone music source with dual FM/SD/USB/Bluetooth players. Additional sources include front panel AUX inputs and 2 line level inputs at the back of the device. Outputs can be selected to use any of these inputs, have separate EQ controls. End users will appreciate included IR control and easy to use features of the device.

One more uncommon feature for a music player – MP 22 can be used as 2 zone paging system with the addition of AMC Talk ST Z2 microphone desk stand. Microphone gain, EQ, phantom power and input priority settings are available for accommodating any installation without additional equipment.

Visit AMC at stand 7-N205 to test the latest products.
