

Introducing the Draper® Mount Interface for Barco UniSee®

(Spiceland, Ind.) – Tired of trying to precisely align video wall panels on uneven mounting surfaces and dealing with the twisting issues inherent with Unistrut®? At ISE 2020, Draper®, Inc. will exhibit a solution that makes installation of Barco UniSee® video walls easier than ever.

The Draper® Mount Interface for Barco UniSee® is a simple but precise, elegant, and affordable solution. It eliminates inconsistencies in wall surfaces that are not truly flat, while universal attachment brackets simplify installation on nearly all wall construction types.

The Mount Interface can be installed by one person, saving time and money, and attachment of the panels is equally simple. The UniSee wall crosses mount directly to the structure.

Square alignment bracing ensures UniSee panels are properly attached, safely distributing the weight of the video wall evenly across the wall surface and eliminating the need for Unistrut.

The Mount Interface for Barco UniSee accommodates any flat Barco UniSee wall configuration and is compatible with Draper's SmartTrim™ for UniSee®, and both are available now for shipping.

To see the Mount Interface in action, visit stand 12-K70 at ISE 2020, 11-14 February in Amsterdam. It will also be on display in Barco's stand (12-F120).

ABOUT DRAPER:

Draper, Inc. creates core, advanced, and tailored solutions for the professional audiovisual marketplace, including projection screens, custom AV mounts, structures, enclosures and lifts, as well as window shades and video conferencing solutions.

Established in 1902, Draper markets through a network of dealers and distributors to the commercial, architectural, education, and residential markets.
