

-----Press release-----

*Highlite International at the 2019 edition of ISE*

**KERKRADE (NL) – Highlite International BV will be present during Integrated Systems Europe, ISE 2019 from 5 to 8 February at the RAI in Amsterdam, hall 7, stand Y190. At the Highlite stand various installation solutions from DAP Audio, visuals from DMT Premiere LED screens, effect lighting from Showtec and Infinity with the Furion and Signature series will be showcased.**

Since their first edition in 2004, the ISE-event has developed into the largest exhibition for AV and system integration professionals. For Highlite each year the perfect opportunity in this B2B environment to introduce innovative ideas and to provide answers to installation matters. DAP Audio supplies a vast array of installation mixers, very well equipped for zone control with multiple inputs. Amplifiers, like the analogue HP-series, the digital QI-Series or the 100V PA- or ZA-series offer possibilities for multi-roomed venues. In combination with the Celestion powered new XI-MKII installation speaker series the perfect solution for fixed installations.

Besides DAP Audio Highlite has a lot more to offer. Infinity will show the Furion Series, very fast, powerful and intelligent LED-based moving heads, equipped with Wireless DMX. Top of the bill is the Infinity Furion S601 with 4 very precise blades, morphing possibilities and Digital Motion FX. The user friendly Infinity Chimp light controller will trigger your creativity. The Infinity Signature LED based theatre spots, a Robert Juliat collaboration, can be found at the Highlite stand as well.

DMT Premiere LED Screens with pixel pitches ranging from 5.9 to 2.9 will show you the big picture, literally. With their quadruple presentation it becomes very easy to make the right screen-choice for your venue.

Showtec offers a very powerful outdoor washer: the IP-65 rated Showtec Helix S5000 Q4 with 40 Prolight Opto RGBW 4-in-1 10W LEDs and Wireless DMX. Wireless DMX is also present in the Showtec Eventspot 1600Q4, a battery light with an intelligent battery management system up to 15 hours battery lifetime per usage even if the battery is not 100% charged.

Tuesday 5 until Friday 8 February 2019 you can find the entire Highlite International presentation at hall 7, stand Y190
