Dreams Do Come True: New Category Cable Termination System Overcomes Common Installation Issues

The new, revolutionary [ConnectTec Cat](#) delivers a simple to terminate, flexible, and solid category cable connection... all at the price point you need for your entire system. This hassle free termination center is perfect for every day needs in Data Centers, AV, HDBaseT, LAN, and many other applications and makes a *high quality termination in 90 seconds or less!*

Not being one to simply just *talk* a good game, Liberty AV put the simplicity and quality of use into action at the show with their, 'CT Cat: Race to Win' contest where installers came out in droves to compete for the best termination time.

Quickly, the installers competing found that the system was quick to use and delivered a high-quality termination, with the average installation time of 90 seconds or less, with the winner of the contest, Vic Lomeli nearly cutting the average in half with an *unbelievable 55-second termination time.*

Vic, formerly of [AV Spaces](#) and current [owner/chief integrator of Network Audio Video Integrations LLC](#) was impressed with the termination, stating that it "feels extremely solid... I've wiggled and bent the cable to an extreme measure to see if it would cause a fault in its connectivity, but upon inspection everything remains intact. Working in small spaces where the cable maybe has to make a sharp 90° turn I have encountered connections becoming undone or wire pop out of the pinched down termination."

A Complete Connection Collection

[ConnectTec Cat's](#) high quality collection of plugs, jacks, and keystone inserts are fully ANSI/TIA-568 Compliant & UL approved. This system is designed for shielded and unshielded category cable needs and offers a full lineup of Cat5e, 6, 6A & 7 connectors and tools.
