Lumens VC-A50P PTZ IP Camera and Camera Controller Help Facilitate Interpreters' Programs at the 2019 G20 Summit

Capturing World Leader Speeches with Dynamic Pro AV Technology

Hsinchu, Taiwan – June 26, 2019, Lumens™ Integration Inc. today announced the VC-A50P PTZ IP camera and VS-KB30 IP and Serial camera controller were selected to provide the best image quality in the high profiled conference, the 2019 G20 summit, to help ensure accurate communication is being produced in multiple languages that are conducted by professional interpreters. The G20 (or Group of 20), is one of the world leader events which was founded in 1999 and is made up of the world's 19 biggest economies and European Union with the aim to promote international financial stability and to discuss world affairs. This year, Japan will be hosting for the first time in Osaka on June 28-29.

As multiple languages are spoken in one meeting, simultaneous interpretation plays a big role in the G20 Summit ensuring smooth communication. To ensure the best work conditions for the interpreters, the host of the G20 Summit installed 20 VC-A50P cameras and paired the IP camera controller VS-KB30 to capture the speaker's movement and live stream videos to the interpreter's screen, which is able to improve the language accuracy in real-time.

"Lumens VC-A50P PTZ camera was chosen due to its outstanding capability. The cameras were easy to install, supports PoE for long distance image/sound transmission and offers a nice image quality. The newly released IP camera controller also satisfies the need of control in order to broadcast the videos," stated Hideki Utsugi, Manager of Network Solution Business Unit, MTC Japan. In addition, the VC-A50P is compatible with the selected conference and discussion system for the event, which increases the reliability and compatibility for a wide range of business users.

"This is a significant step for Lumens, as our PTZ camera and camera controller wins the client's trust and shares the world stage. Lumens products have a proven track record in product quality and performance," said David Liu, sales director of Lumens Digital Optics Inc. *"We look forward to working closely with our Japanese customers and provide an advanced and reliable videoconferencing solution to benefit their Pro AV programs."*
