

## ORAY Projection Systems and custom manufacturing

Some projects require the integration of specific systems.

This may concern the particular dimensions or techniques, a precise configuration or a visual customization of the desired product.

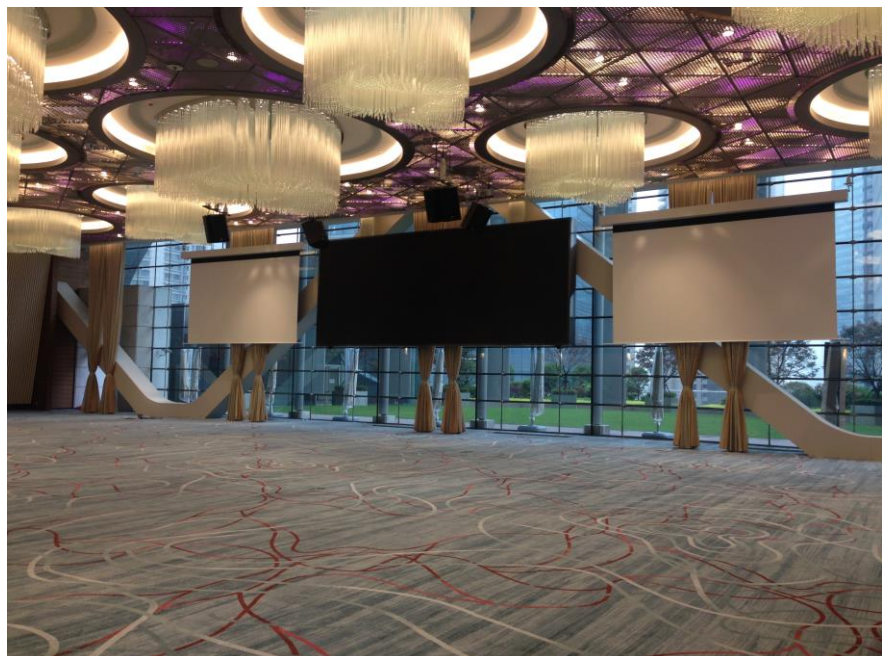

ORAY Projection Systems is able to answer to different requests for customization, allowing you to define unique criteria depending on the model you are targeting.

We propose to make your projects unique thanks to custom-made projection screens and home cinema seats.

Depending on the model, this customization can concern :

- The choice of the projection surface
- The product adapted to your dimensions
- Printing on projection surface (possibility of printing a logo on the projection surface for example)
- The choice of the color of the casing
- The possibility of additional technical options (safety brake for example)

We are at your disposal to speak with you about our different possibilities.

## Company Overview

Since 1947, ORAY Projection Systems specializes in design, manufacturing and marketing projection screens and audiovisual accessories.

Active in all fields, from theaters to schools, from congress centres to home cinemas, from businesses to simulators, all the projections or retro-projections are controlled and integrated into one of the most competitive ranges in the world. Present in over 50 countries, ORAY accompanies its distributors in their most ambitious projects.
