# NMP40 – Audio Streaming Sourcecon™ Module

Belgian pro audio manufacturer AUDAC is expanding its range of modular audio player solutions with the NMP40 - Audio Streaming Sourcecon™ Module. This revolutionary audio streaming solution allows you to connect your professional audio installation with the industry's leading streaming services.

Compatible Soundtrack Your Brand you can stream music straight to your professional sound system directly from the cloud while using your computer or mobile device only as a controller. Tthis unique collaboration between AUDAC and Soundtrack Your Brand allows you to connect your professional audio system to the world's largest catalogue of licensed music for public and commercial spaces. Following the example of Soundtrack Your Brand, a strategic agreement was also concluded with Spotify, allowing users to access the most popular streaming service on the market. In addition more streaming services will be added in the near future.

This brand new module is a great addition to the ever-growing SourceCon™ range that AUDAC has to offer. Earlier SourceCon™ modules for example, internet radio, voice files are already used worldwide due to their modular character and versatility.

While keeping true to the SourceCon™ mindset the NMP40 can easily be installed in a compatible device like the XMP44 without the need for additional configuration or setup. The Installation is easily done by sliding the modules into guide rails. This allows a simple and fast installation without requiring additional internal wiring or complex configuration.

When inserted the module it's plug & play, the module is instantly installed, discovered and ready for operation. The same counts for its discovery in the preferred streaming solution. If the module is connected to the same network, it will be automatically discovered on a mobile device or computer and a possibility to choose it as output device will be available.
