

Yamaha UC Prepares Higher Education Technology Managers For Growth in Distance Learning at ISE 2019

Yamaha UC Will Present Speaking Session on the Video Conferencing Solutions Available to Solve Challenges, Create Dynamic Collaboration Environments During SCHOMS Discussion

SUDBURY, Mass. — Jan. 8, 2019 — [Yamaha Unified Communications](#) has announced that Philip Stanley, Yamaha UC's Director of EMEA, will lead an instructional session at ISE 2019. The session is part of the Standing Conference for Heads of Media Services (SCHOMS) U.K. Higher Education Hosted Buyer Programme and will take place on Feb. 6 at 1:55 p.m. in room G001 and G002 at RAI Amsterdam. The session will examine how video conferencing solutions can enable clear, high-quality remote learning experiences from any smart device or PC no matter where they're located.

“Unified communication applications are becoming an ever more pervasive platform for enabling learning outside a physical classroom,” said Stanley. “This has added more responsibilities for tech managers whose job it is to build the infrastructure to support this change and select equipment that will ensure the best audio and video quality experience for participants. In this session, we’ll help navigate common challenges, ways to address them and UC requirements to create the best remote learning environment.”

Stanley will share the timeline of video conferencing capabilities, discussing how dedicated hardware coupled with sophisticated and affordable UC platforms allowed enterprises to successfully bridge remote participants together and how these same tools can be used by higher education institutions to enable learning. This presentation will explore the solutions that will replicate the high-quality, conferencing capabilities that technology managers can use in their classrooms. The 30-minute session will conclude with a Q&A. More information can be found at www.schoms.ac.uk.

###

About Yamaha Unified Communications

Audio and video conferencing solutions from Yamaha Unified Communications, Inc. streamline collaboration and boost productivity wherever people work. Yamaha's renowned and rigorous approach to development and manufacturing of enterprise-grade microphone systems, conference phones, and video sound bars ensures superior audio quality, reliability, and flexibility. With both wired and wireless

options, Yamaha's unified communications (UC) products enable users to have natural, clear conversations in every meeting space.
