Press Release

Making working together simpler

The Clevertouch Enterprise Ecosystem for the agile workspace

Launching at ISE 2019

Hall 13 stand D155

This year at ISE, Clevertouch is launching the 'Enterprise Ecosystem', an all-one-solution designed for the agile workspace. A real-time collaborative platform that enables participants to work together seamlessly in an open environment no matter where they are located or what device they are using, whilst ensuring that the company's underlying networks remain totally secure.

Clevertouch will also be celebrating its 10th anniversary at ISE. It's been a decade since the unveiling of its pioneering new technology in 2009, the world's first interactive touchscreen display, which took the market by storm. For the past 12-months, the development team behind this market leading interactive touchscreen has been focused on researching and developing the ultimate enterprise environment. We're excited to reveal and demonstrate the new ecosystem in its entirety at ISE 2019.

Connecting multiple users on a common platform is an essential goal for businesses today. More enterprise entities are deploying Unified Communications and BYOD concepts, using Skype for Business and other solutions, to enable users to overcome barriers to collaboration. Meeting spaces are evolving, with more huddle areas and open spaces for informal and unscheduled team meetings, requiring additional AV technology to connect people remotely. This way of working is becoming

CLEVERTOUCH

the norm - no longer do we need to book a meeting room or wait for availability – we can schedule a time and everyone simply logs-in from their touchscreen in the office, laptop, phone or tablet.

“Enabling employees to use collaborative technology should be simple and uncomplicated for everyone. Users should decide how their technology works, the technology shouldn’t dictate their path. Unlock content and data from individual devices, move it into a shared workspace so that everyone in the team can access it simultaneously, regardless of whether they’re in the office or on the other side of the world,” says Shaun Marklew, Chief Technologist at Clevertouch. “Operating platform, device or software is no longer the obstacle – in fact the tech and hardware should be completely irrelevant to participants. It’s important that technology enhances, not impedes, the free flow of ideas and the power of the collective mind.”

The feature-rich ‘Enterprise Ecosystem’ comprises of video and voice conferencing, screen sharing and mirroring, file sharing, infinity whiteboarding, remote on-screen annotation, digital messaging, instant alerts, room and meeting booking system and enterprise-wide digital signage across any connected screen-based displays – connecting multiple users on a common platform.

Simplicity, ease-of-use and security are the three things that make the Clevertouch ‘Enterprise Ecosystem’ stand-out. Unlike other collaboration environments, which require users to install apps and/or plugins often conflicting with the organisation’s internal security protocols, the Clevertouch ecosystem requires no downloads and can be configured to work within a company’s unique network and security framework.

The E-Cap from Clevertouch is the central hub of the ‘Enterprise Ecosystem’. The latest interactive display benefits from a blend of two technologies that combine IR technology and electro magnetic resonance. The two technologies have enabled Clevertouch to create an advanced, durable and lightweight display with outstanding touch accuracy and responsiveness, delivering the same user experience as a capacitive screen, but at a fraction of the cost.

Come and see us in Hall 13 stand D155 for a one-to-one demo of the Clevertouch Enterprise Ecosystem.

About Clevertouch

Clevertouch is an award-winning British manufacturer of large format interactive touchscreen panels for collaborative education and business environments.

CLEVERTOUCH

Unlike other manufacturers, Clevertouch does not believe in a one-size fits all approach. Before entering a new vertical, the development team first research the needs of the individual sector and then design and develop the perfect display.

Technology in business is nothing new but the demand for real time collaboration and feedback for your workforce is becoming an everyday requirement. Clevertouch has responded with a range of interactive collaboration touchscreen, each one featuring a ready-to-use integrated 'Enterprise

Ecosystem' delivering video conferencing, screen sharing, remote annotation, whiteboarding, digital messaging, room booking and on-screen alert solution.

Press information:

Drop by the stand or book a timeslot for a one-to-one demo of the entire collaborative 'Enterprise Ecosystem'. Introduce yourself to the 'on-stand team' to receive a free glass of champagne and a complimentary gift from Clevertouch.
