FOR IMMEDIATE RELEASE:

tvONE debuts enhanced CORIOmaster at ISE 2019

Margate, Kent, UK, 31 January 2019 - tvONE (tvone.com), a leading designer and manufacturer of cutting-edge video and multimedia processing equipment, is launching new enhancements to the powerful CORIOmaster (4RU), CORIOmaster mini (1RU) and CORIOmaster micro (1/2 RU) video wall processors to help end users stand out from the crowd. The new enhancements will be featured first at ISE 2019 (Stand 1-M140).

The enhancements include a secure communication suite with full REST API and multi-user control. Other improvements include an HDMI 4-port output module (CM-HDMI-SC-4OUT), audio support for the CORIOmaster and CORIOmaster mini for embedded audio, and a dedicated audio module (CM-AUD-2IN-4OUT). The new modules will be shipping at the time of the show.

Secure communication protects your installation from outside interference in these security-conscious times. The HDMI 4-port output upgrades your C3-540 CORIOmaster to up to 56 outputs, making massive video walls, projector edge blends, and LED installations easy and smooth. The new embedded audio support and audio module ensure the CORIOmaster is supreme when you need both video and audio in an installation. The IP streaming module now accepts both H.264 and H.265 (HEVC) for higher quality, increased bandwidth performance and includes a low latency mode.

Also featured on the stand will be a collaboration of products from tvONE and sister company, Green Hippo (Hall 5, stand W-100). Paired together, Hippotizer Media Servers and tvONE's CORIOmaster video wall processors offer unique, ultra-high resolution generative content, media manipulation with super-low latency, and live capture compositing for a wider range of corporate markets and installations. Give your lobby the chance to turn into a live event! Catch the demonstration on tvONE's stand, 1-M140.

###

About tvONE

tvONE is a world class developer and manufacturer of video conversion and AV signal distribution technology, with offices in the US, and R&D and manufacturing facilities in the UK. tvONE provides a complete line-up of products and services for the professional AV, broadcast video, and digital signage markets. Following the global merger of tvONE and Magenta Research in July 2013, the company tvONE now encompasses these two superior brands under one umbrella.

The tvONE brand specialises in video, audio, and multimedia processing equipment, based on its proprietary CORIO® video conversion technology. Products include all-in-one system solutions, windowing processors, scan converters, seamless switchers, video scalers, up/down/cross converters, analog-digital converters, including SD/HD-SDI, HDMI, and DVI, format converters, and standard converters.

Magenta Research is the industry-recognised brand for the transmission, switching, and flexible distribution of multi-format video, audio, and auxiliary signals over fibre and Cat-X cabling. Products include AV extenders, distribution amplifiers and matrix switchers for DVI, HDMI, VGA, and component, composite, s-video, audio, USB, and RS-232 signals.
