

## **Focus on customized hardware solutions for TFT displays at ISE 2019**

As a reliable partner for digital signage system integrators Distec will be presenting its wide product range of innovative system solutions for TFT displays at ISE 2019 - the best-attended professional AV and systems integration trade show in the world, taking place February 5-8 at the Amsterdam RAI. At stand N180 – in hall 10 our appearance will be focused on customized hardware solutions for TFT displays for industrial, business and retailing applications.

### **75" 4k monitor, multitouch displays and user terminals**

One highlight will be our new large-format monitor „Brilan 4k 75". With a resolution of 3840 x 2160 pixels and 700 cd/m<sup>2</sup> brightness the robust Ultra High Definition (UHD) 4K TFT monitor is a suitable digital signage solution to ensure successful POS-marketing activities.

In order to meet increasing requirements on innovative touchscreen systems Distec is cooperating with the science-based multinational conglomerate corporation 3M. Monitors in the sizes 43", 55" and 65" with integrated 3M multi (P-CAP) touch as first successful results of this technical cooperation will be showcased.

In the field of customer specific solutions Distec will be exhibiting user terminals including a wall mount with a tilting mechanism and which is adjustable in height. Other customised monitors exhibited at our stand are optimised for suspension from the ceiling with all cable connections located at the top.

### **Learn more about our established products:**

- modular designed POS-line series
- monitors from our IoT series (POS-line) driven by Raspberry® PI (CM3) are suitable for cost-effective retail 4.0 applications
- high brightness TFT-displays are equipped with a powerful LED backlight (2.500 cd/m<sup>3</sup>) to ensure readability of the screen with optimal contrast and color despite challenging sunlight or high ambient light levels
- fireload and smoke optimised (FLO) monitors are increasingly applied as information and guidance systems in critical areas with strict fire safety requirements

### **Other highlights:**

Our narrow bezel monitors perfectly qualify for the assembly of smaller and cost-efficient video walls: They are colour calibrated and their grid layout allows a 2x2 configuration with a 4k maximum input resolution signal which is splitted into Full HD resolution for each display.

Moreover Distec will present a 37" bar type TFT display. Special feature: The unusual format enables panoramic views for your content.

**About Distec**

Distec is a Fortec Group member and a worldwide operating specialist for TFT flat screen and system solutions for industrial, multimedia and digital signage applications. Located in Germering near Munich in Germany, the company designs, produces and sells innovative solutions and a full range of components, displays and services. Distec supplies innovative Green IT solutions based on their hardware platforms and their own software to control the TFTs of partners AUO Innolux, Kyocera, Mitsubishi, Ortustech, SGD and Tianma as well as selected panels from other manufacturers. These system solutions - from assemblies and kits up to finished OEM products - are developed in their own R&D centers in Germering (Germany) and Ronkonkoma (NY/USA). The range of services includes customized developments and adaptations, product finishing and assembly of monitoring systems as well as the production of finished products and a complete after-sales service with RMA, repair and technical support. Moreover Distec has access to products, services, and expertise of the large Fortec high-tech company network, which makes a perfect complement to the product portfolio.
