EDBAK's Newest AV Solutions at ISE 2019, Hall 5-S40

This year in Amsterdam at ISE 2019, EDBAK will present the company's newest line of aluminum products: video conferencing trolleys, video walls for LCD monitors & LED screens and projector mounts. Among them will be the brand new TRF100 universal interactive flipchart trolley and an electric version of the ERM101 video wall mounting bracket (adjustable with a mobile app).

Piotrowice (near Lublin), Poland—EDBAK, European leader in manufacturing of AV mounts, stands, trolleys and kiosks, will present new products at its stand in Hall 5 during ISE 2019.

As the projector, display and digital signage industries adapt to the changing market, EDBAK continues to launch new and innovative products, as well as updates current products lines to stay competitive and maintain its leading position.

*"We are proud that last year we launched a series of modern products manufactured from light aluminum profiles," notes **Gregory Bak**, International Sales Director at EDBAK. "Our goal is to always be ahead of the times and so far we have always managed to offer our clients the most innovative and competitive products and solutions available on the market. This was confirmed by the 'The Best of Show' awards that we received at ISE in 2016 and 2018 with our products **VWPOP65-L** and **ERM100**."*

The company participates in numerous international trade events and fair, and expands its network of business partners. Its mission is to offer products of the highest quality at reasonable prices to customers, but also to provide excellent and quick services as well as availability of products on short notice. Moreover, the company's R&D facilities can also design dedicated products customized and tailored to the needs and requirements of individual customers.

*"There are 3 key qualities that are of highest significance in our business and these are the following: a wide range of products, excellent value for money, and the ability to provide customized solutions," adds **Gregory Bak**.*

These are some of the company's newest products made with light aluminum alloys.

NEW SOLUTIONS

• **VSM** - Swing Arm Wall Mount Series

• **VWSA** - Video Wall Stand

• **TRV** - Video Conferencing Trolley's

• **WPMV** - Wall Projector Mount

• **VWPOP40** - Small Pop-out Video Wall Mount

• **VWPOPT65-L** - Slim Video Wall Pop-out Mount

• **TRF100** - Trolley with rotational head and height adjustment

What you should know about EDBAK...

- EDBAK is proven B2B partner for companies from various industries – one can find our solutions at the Warsaw Chopin Airport or in the European Parliament, to name a few, and this will be our 13th time that we're presenting our products at Integrated Systems Europe
- Our company is located in the very center of Europe, in the heart of the CEE region, and therefore EDBAK can offer a viable European alternative to Asian suppliers.
- Among EDBAK's core values are competitiveness and top quality. The company received ISO9001 certification from **TÜV Rheinland**. Many Edbak products also have TÜV product safety certification.
- EDBAK is constantly innovating (check out the new electric version of **our award-winning ERM101 video wall mounting bracket**, now adjustable with the use of a mobile app).
- Unlike importers, EDBAK is a true manufacturer and therefore can offer the services of an in-house R&D department to design and construct tailor-made solutions (using *Autodesk Inventor* and *Solidworks 3D* designing software). Customers benefit from an in-house testing laboratory with CMM machines.

The Company

EDBAK Sp. Ltd. with headquarters in Piotrowice near Lublin in Poland is an expert in metal manufacturing. The company was founded in 1992 by Edward Bak. EDBAK is a leading European manufacturer of AV display mounts, stands, trolleys, kiosks and video wall mounts.

EDBAK continues to create the latest AV technology, bringing years of manufacturing experience to market trends that drive the display, projection and digital signage industries. EDBAK has invested more than EUR 2.5 million in new automated manufacturing equipment for their ISO 9001 facility to speed up the manufacturing processes and to cut production costs. This also helps EDBAK meet demand for solutions that few other companies in Europe can deliver.
