

Matrox and BrightSign Collaborate to Drive Video Wall Showcase at ISE 2020

Newest QuadHead2Go multi-monitor controllers to combine with latest BrightSign 4Kp60 players for exceptional, easy-to-deploy digital signage platforms

Matrox QuadHead2Go Q155 multi-monitor controllers combined with BrightSign players allow for leading-edge, digital-signage-based video walls.

MONTREAL — February 3, 2020 — Matrox® today announces that it will be collaborating with BrightSign® for a premier video wall demonstration of the newly-announced **Matrox QuadHead2Go™ Q155** multi-monitor controller with HDMI capture at Integrated Systems Europe (ISE) 2020, in stand #11-D120. By capturing the powerful 4Kp60 capabilities of BrightSign digital signage players, the QuadHead2Go Q155 appliance makes it easy to add more multi-monitor and video wall display possibilities to the already vast palette of video wall configuration options of BrightWall™ and other BrightSign tools.

“At ISE, Matrox will demonstrate how we can take BrightSign’s already super-flexible multi-player synchronization and video wall capabilities and provide additional installation and retro-fit opportunities,” said Samuel Recine, vice president of sales for the Americas and Asia Pacific in the Matrox AV/IT Group. “BrightSign has powerful authoring tools, and each generation of digital signage players offers more CPU and graphics processing power. QuadHead2Go Q155 is an elegant, hardware-based, multi-monitor controller that provides digital signage integrators with even more complementary configuration choices next to BrightWall’s already impressive arsenal.”

“There are more and more digital signage project requirements that drive our systems integration partners to create new and elaborate installations,” said Jeff Hastings, CEO of BrightSign. “The Matrox QuadHead2Go Q155 multi-monitor controller is a powerful tool, yet unobtrusive to the spectrum of capabilities powered by BrightSign. We look forward to seeing some of the art our community of partners will showcase with this combination.”

Available in HDMI input appliance and card form factors, QuadHead2Go Q155 multi-monitor controllers work seamlessly with BrightSign 4K players to drive dynamic, next-generation video walls.

ANY SOURCE. ANY SIZE. ANY CONFIGURATION.
