

BXB HDR-731 Streaming Media Solution

Professional livestreaming can be made as easy as possible!

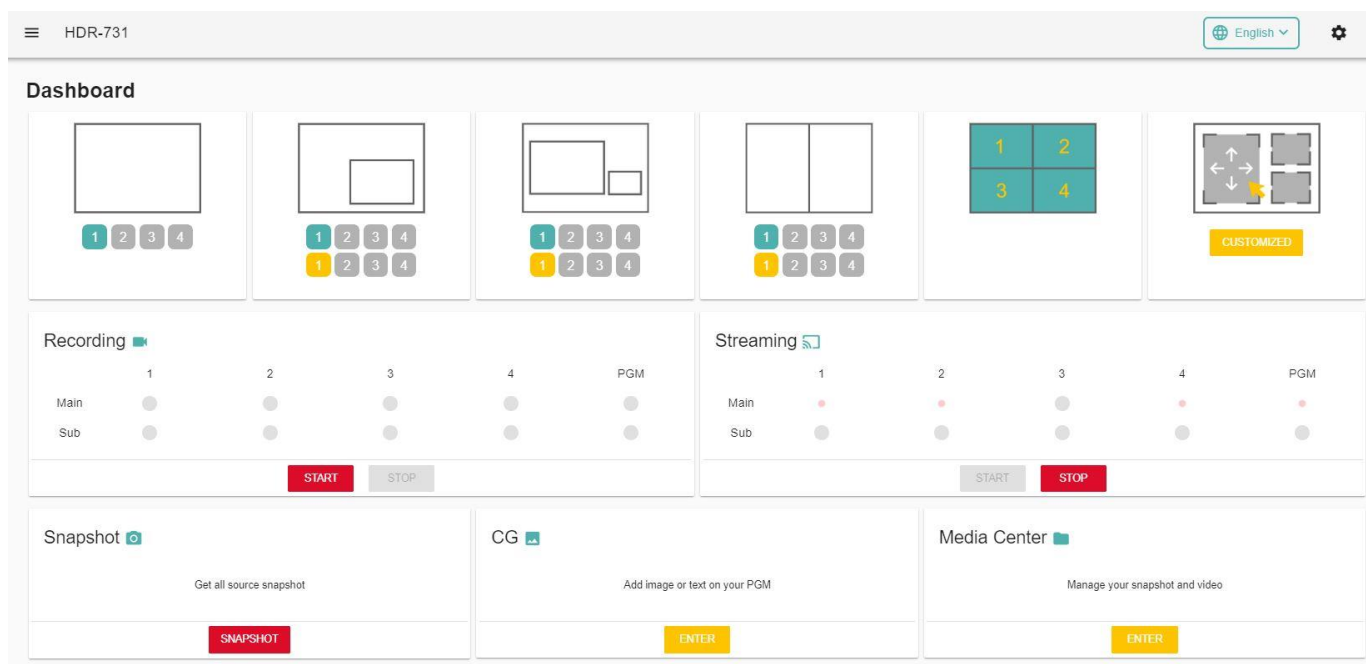

BXB offers professional and all-in-one system integrating video capture, livestream, 1080p HD video seamless switch, audio mixer, and dynamic layout production. It's big on capability but easy with operation. With just one button click, you can stream video to every mainstream platform, including Youtube, Facebook, Vimeo, Twitch, and 100+ platforms (compatible with RTMP, HLS, RTSP, TS protocols). You can livestream to two platforms at the same time.

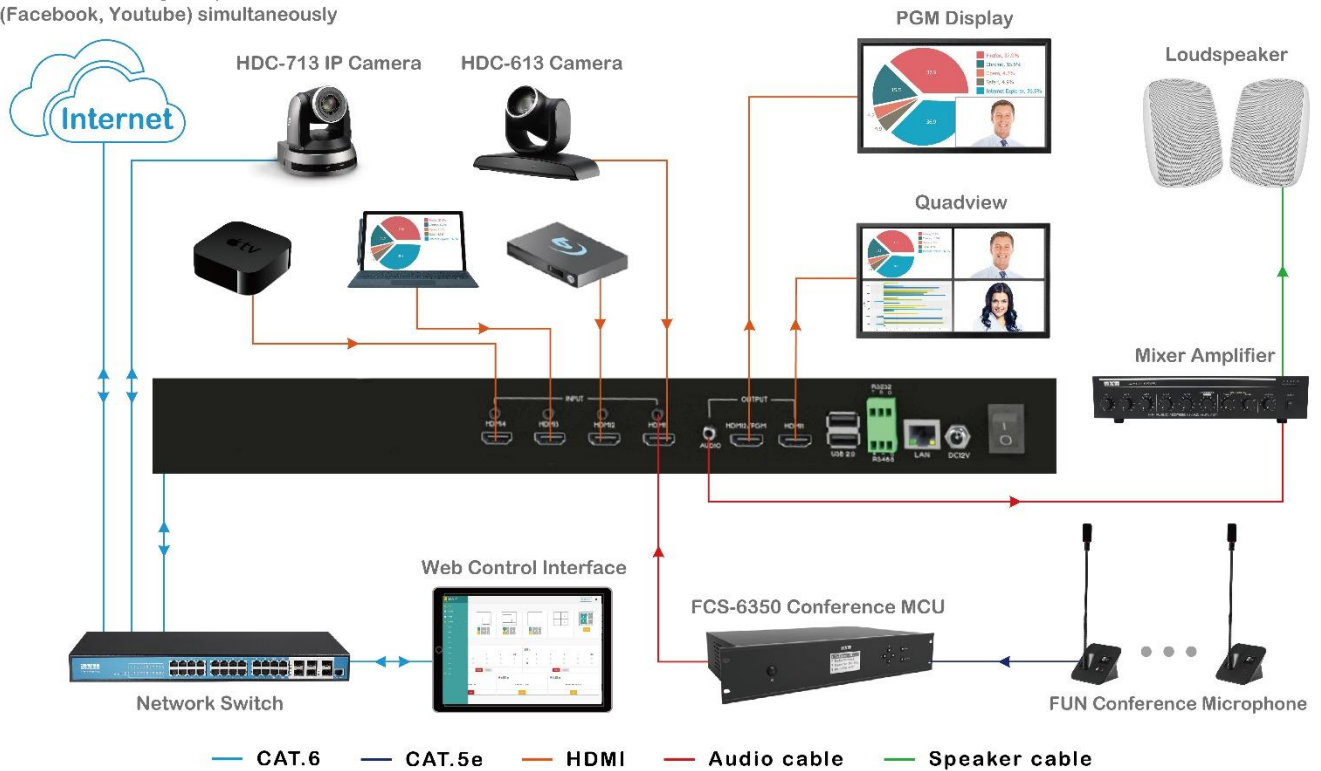

While livestreaming, your video can be captured and recorded concurrently. BXB offers flawless H.264 encoding for maximum video performance. You can separately record 4-CH and PGM with all your needs for post-production and database, capturing every precious moment into the video. We offer 1TB storage and supports USB and NAS to extend the storage space.

Moreover, BXB's solution offers web-browser based interface for self-defining the video layout. With easy drag-and-drop, you can make dynamic layouts including PIP, PBP, Quad, and more for dynamic visual presentations, taking your live broadcasting and post-production to the next level.

Live-stream to any two platforms
(Facebook, Youtube) simultaneously

Simply record your meeting, seminar, training, and product release and then livestream to every mainstream platform, BXB's streaming media solution is your best choice!
