Technomad expanding European sales network.

Technomad, a leader in weatherproof audio solutions, is expanding its sales network into Europe.

BOSTON, January 30, 2020 –

Technomad, a US manufacturer of real weatherproof audio solutions, is expanding into Europe building a sales network. Working with industry vet Mike van der Logt of 4M4You, Technomad will be exhibiting at the ISE in Amsterdam to meet with top European distribution and systems contractor firms to start building sales relationships across the continent. Offering an unparalleled combination of performance and weatherproof design, Technomad products deliver the highest quality audio in any environment or climate. Using the latest in green manufacturing techniques, Technomad is also a green choice. With a product range which includes loudspeakers, amplifiers and portable systems, Technomad has a solution for your all environment audio needs.

Visit the Technomad booth at 5-W120 to learn more.

ABOUT TECHNOMAD

Technomad LLC, founded in 1995, designs and manufactures loudspeaker systems for the professional audio and security/military technology industries. The company invented the first reliable full-range weatherproof loudspeaker and now offers eight models ranging in power from 150-watt loudspeakers to 1500-watt subwoofers — most available in Turnkey PA System packages featuring amplifiers, mixers and other signal processing equipment in pre-wired racks. The company also manufactures a variety of audio infrastructure and communications equipment including playback and recording systems, weatherproof power amplifiers and turnkey remote audio systems. Contact Technomad at 617-275-8898 or visit www.technomad.com for more information.
