

FOR IMMEDIATE RELEASE

VIVITEK AND DELTA DISPLAY SOLUTIONS INVITES ISE 2020 ATTENDEES TO EXPERIENCE A WORLD BEYOND VISUAL COMMUNICATION

Announces three new exciting additions to existing range of visual solutions

Hoofddorp, 18 December 2019 - At ISE 2020, Vivitek, a brand of Delta, together with Delta Display Solutions, is inviting attendees to experience a world 'Beyond Visual Communication' on its **stand in Hall 5-S30** at the world's leading AV industry exhibition. In addition to it showing its popular NovoConnect Solution range – which presents the most powerful way to share knowledge, ideas and information, quickly and easily – Vivitek will also introduce three new exciting additions to its existing visual display and collaboration solutions. Debuting at ISE 2020, the new additions include: NovoDisplay – an all-in-one collaboration/signage display; NovoProjector – a collaboration projector, and the NovoTouch EK Series collaborative touch panel for Education.

Like all Vivitek solutions, the latest introductions have been developed to support meetings with outstanding visuals to ensure effective collaboration at all times; whether it's a small brainstorming session or a multi-participant board meeting, Vivitek's projectors and display offerings present the most powerful way to share knowledge, ideas and information, quickly and easily.

NEW from Vivitek at ISE 2020.

NovoDisplay – all-in-one collaboration/signage display:

The NovoDisplay Series offer the first all-in-one collaboration and digital signage display, and is the most complete flat panel display offering. With NovoDisplay, there's no need for any add-on solutions, as this panel features it all. Sure to impress users, is its superb, 4K-UHD resolution. Also of note, is the ease with which it enables users to interact with their audience. With built-in NovoConnect – Vivitek's wireless collaboration solution – NovoDisplay offers simple wireless mirroring as well as collaboration tools, such as split screen presentations - to help all users interact easily.

For added versatility, during periods of downtime, NovoDisplay can be utilised to stream signage content to employees or guests, ensuring that users can maximise value their investment.

The NovoDS digital signage software is included for free, allowing users to communicate anything they want, ranging from corporate messaging to the daily canteen menu, along with live RSS feeds on weather forecasts, or a simple 'Welcome' message for guests. The inclusion of NovoDS bridges the gap between wireless collaboration technology and digital signage in the most user-friendly and cost-effective way. Including free software and a remote management tool at no extra cost, it's an essential purchase for those seeking an all in one display, collaboration and signage solution.

NovoProjector – Collaboration projector:

Vivitek offers two NovoProjector models as an innovative all-in-one projection solution. Designed for medium-sized meeting rooms, it offers much more than the functionality of a projector, making it ideal for companies that would benefit from its extensive wireless collaboration features that make it easy to set up, use and maintain.

Available with a laser light source as well as a lamp-based projector there is a choice to suit all needs. Both NovoProjector models boast 4,500 lumen projection and 1080p resolution. Further stand-out features of these projectors are the collaborative tools that come built-in, such as wireless presenting and screen mirroring, annotation and moderator functions, the ability to display four users simultaneously on the split screen as well as its cross-platform compatibility with Windows, macOS, Ubuntu, Android, iOS, and Chromebook.

NovoTouch EK Series for Education:

Vivitek's NovoTouch EK Series for Education comprises three fully-featured interactive displays that have been designed to cater specifically for the budget-conscious education sector. Available in sizes ranging from 65", 75" and 86", all offer the visual brilliance of 4K-UHD resolution, ensuring that the screens invite and encourage engagement and participation in the classroom. The NovoTouch EK Series features whiteboard software and NT Live functionality, in order to duplicate the screen in real-time to multiple displays, which is ideal for any classes or groups that need to be split across two classrooms.

The NovoTouch EK Series also feature screen recording with NT Minutes, which enables students to review the lesson at a later stage, or it can be shared with students who were unable to attend the lesson. For added value and convenience, Vivitek's NovoDS digital signage solution is included. This makes it easy to communicate any school notices, canteen specials or lesson or room updates, during downtime between lessons. Meanwhile, remote management and free firmware upgrades are included to facilitate easy maintenance without hidden costs.

Reliable and durable Delta Video Wall solutions

Bringing further excitement to the booth will be Delta Display Solutions' FE Series, with its range of LED solutions for indoor and outdoor displays. Showcasing on a sample wall, Delta's LED Wall Solutions deliver excellent image quality and uniformity thanks to their fine pixel detail, whilst being highly reliable and durable. The LED Wall Solutions excel in high ambient light environments, both capturing the audience's attention and making for a highly memorable viewing experience. Also showcased will be an LCD wall with a narrow bezel of 0.9mm. As these products demonstrate, Delta's LCD video wall displays are an ideal solution for demanding, yet space-constrained control rooms. Delta's LCD displays can be stacked together to achieve virtually any screen size, setting a new standard for large format, high-impact display solutions.

Visitors to the joint Vivitek - Delta stand can also view and experience the performance of Delta's video wall cubes in UHD 4K resolution and laser-phosphor technology designed for control room environments. Video source, camera, and content are increasingly in 4K, while Delta's 4K monitoring map area can be up to four times wider than HD offerings - making it ideal for control rooms where detail is everything. Delta's considerable experience in video wall technologies ensures reliability and durability in many 24/7 applications, and can be depended on to bring control to even the most challenging of events or environments.

Commenting on its presence at ISE 2020, Holger Graeff, General Manager, Vivitek EMEA, stated: "Solutions have always been at the heart of Vivitek's offerings and visitors to ISE 2020 will be able to experience for themselves how Vivitek's latest solutions deliver value that goes Beyond Visual Communication. Today, Vivitek offers the broadest range of digital projectors and displays, an ecosystem of collaboration solutions, combined with easy-to-use digital signage devices. Our latest additions introduced at ISE 2020 build on this legacy, giving customers an even greater choice. Indeed, our excitement for the show is a fitting tribute as we say good-bye to our fabulous hosts at RAI Amsterdam, while thanking them for making ISE the outstanding success that it is today. We are confident that the spirit of the show will be present and flourish at ISE's new home in Barcelona in 2021."

Vivitek / Delta Display Solutions – a Gold Sponsor at ISE2020 - Hall 5-S30
