

M SH-110

Striving For Perfection

****Utility Model Patent****

SH 110 The patented SH 110 from MacMike is a transformed version of SH 310. Its unique elastic double-line design not only increases stability on ear but also maneuverability. The patented design on earlobe allows the boom to be adjusted 360 degrees, which allows users to change left/right ear without spending too much time readjusting boom again. It is also easy to adjusted boom length to fit different face shape and size. We call the SH110 series the PERFECT single-hook microphone **M**
