

BESTBOARD Debuts Smart Conferencing Solutions At ISE 2020

BESTBOARD, (December 12, 2019) – Sinocan International Technologies Co., Ltd. A leading manufacturer of interactive touch displays and conference solutions, will be showcasing a range of smart conferencing devices and collaboration tools during the ISE 2020, 11 – 14 Feb in RAI Amsterdam.

The Ultimate All-In-One Smart Conference 4K Display

BESTBOARD S5 series interactive conference all-in-one 4K display eliminates the need for stand-alone projectors, PCs, TVs, whiteboards, cameras, microphones and speakers by folding all of these technologies into a single slim, wireless and video conferencing ready smart conference all-in-one. Allowing users to instantly host or join video conferences without having to worry about the compatible issues of the camera, microphone and speakers, and greatly reduces the maintenance and troubleshooting needed for your IT apartment.

Connect Effortlessly, Collaborate Efficiently, Interact Smoothly

Say goodbye to excess cables, dongles and adaptors, BESTBOARD allows multi-device interaction wirelessly without compatibility concerns, no matter if its Windows based notebooks, iPhones/iPads/Mac, Android based phones/tablets or even Chromebooks, all these devices can now connect, collaborate and interact with BESTBOARD effortlessly, efficiently and smoothly.

Advanced Touch Technologies, Precisely Simplified

By using projected capacitive (PCAP) with optical bonding glass along with electro-magnetic resonance (EMR) pressure sensing stylus, the minimalistic designed S5 series not only offers more smooth and responsive touch/writing experience over traditional inferred (IR) touch screens, the bezel-less, slim and sleek outlook (only 17mm thick panel) also adds a modern-classic professional façade to your office and meeting rooms.

Come and visit BESTBOARD at booth 15-M240 to experience the next generation of smart conferences. For more information, please visit the [BESTBOARD website](#) or follow them on [LinkedIn](#).
