

We realize that light is not static, its quality changes is important to people's work and life. So, we believe, light is a story that can be shaped and told as people wishes. Optics can be one of the most imaginative innovations in lighting design. To understand what it must deliver takes vision and specialized experience.

Originally founded in 2003, Toplite has specialized in innovative optic design and provided high-quality optical components for more than 16 years. With the unique and professional perspective on LED optics and rich experiences, our optical design and products will bring first-class experience to your LED lighting.
