

GoBright is proud to show one of the most complete Room, Desk and Visitor Management solutions in the market on the ISE.

Chris Wiegeraad, Channel Development Manager of GoBright says: “We are giving organisations the opportunity to develop new ways of working successfully to provide them with one user-, IT- and facility-friendly platform for their entire room, desk and visitor management. In our booth we will demonstrate our Room Booking software with our Control, Catering & Services, Wayfinding and Detection modules. We will show our newest hardware, the Desk Connect and the Desk Glow, amazing solutions to visualise the availability of workspaces. And finally we will also show our digital visitor registration software. Together a very strong combination, manageable in one easy-to-use platform.”

Meet the GoBright team in Hall 10, booth H200.
