

Press Release – for immediate release

### **TeamBoard launches new range of IFP solutions at ISE 2020**

TeamBoard, a Canadian based company, now under new management are undertaking a series of new technology releases at the show in Amsterdam this year.

The company is well known for its 20+ years in the industry having brought to market one of the first Interactive Whiteboards simply known as ‘TeamBoard’ back in the noughties.

Fast forward to 2020 and the new management for the company are hugely excited to release the latest TeamBoard series of IFPs along with the custom built TeamBoard mobile solutions.

The IFP series benefits from 10 years of collaborative development and engineering input from across North America, Australia and China offering bleeding edge feature sets to distributors in this incredibly exciting market sector.

The TeamBoard panel features an ultra slim IR technology which delivers a lightweight, fast, responsive and robust panel complete with one of the smallest airgaps between glass and LED seen on the market today.

Andy Penman, International Sales Manager says, ‘We are delivering a brand new series of 4K IFPs across the 55” to 98” size range that are brighter, quicker and more intuitive to use than ever before. It is exciting to introduce the brand’s new technology to distributors from across the globe after the incredibly positive reaction the technology has received thus far’

The impressive IFP series is complemented by a unique range of custom built TeamBoard mobile solutions allowing users to navigate any environment with the technology, this range features electric height adjustable and tilt to table technology.

‘Our TeamBoard mobile units are a very stylish addition to our complete bundle offering for distributors, we cannot wait to show the market this range of solutions at the show in 2020’

TeamBoard have already signed distributors for the series in key areas such as Australasia, and are actively looking to add to their growing global network.
