

### **4K imagery through USB 2.0 with the Angeki's Blade 4K Video Conference Camera**

Yes, you read it right. Our Blade 4K is able to run **4K image through USB2.0!** That means you'll be able to save on expensive extenders and can easily retrofit the Blade 4K into an existing conference room and get a high tech 4K upgrade cost effectively.

The Blade 4K provides exceptional image quality at a very affordable price! It has a zoom capability of 5x 4K over USB 3.0/2.0 and 15x HD Zoom over IP and USB 3.0. In addition, the BLADE 4K sits perfectly for a medium to large conference room with it's impressive wide-angle 86.5° FOV.

An amazing array of control options include ZoomRoom remote control support, Visca over USB and RS232, Onscreen App controls and RF control.

At less than €1300 this is a truly exceptional 4K solution that provides ultimate versatility and ease of installation and integration.

Come and see it for yourself at our Angeki's Technology – **Stand 11-G160**
