

SABER IP20x Video Conference Camera – outputs to cover all bases

The Saber IP 20x is designed to meet all major output requirements, supporting IP, HDMI, 3G-SDI and USB3.0 outputs with option NDI output.

Recently, with the help of Heuff Audio & Video Professionals, we were able to conduct multiple testings and finally proud to announce that the SABER IP20x adopts **HTML5**, the newest technology in the market! This means that the SABER IP20x supports additional none IE browser such as Google Chrome, Firefox, Opera and Safari! For this reason, this camera sets us apart from other brands!

Combined the versatile outputs with a long stretching 20x Optical Zoom and 60° field of view with a price point under €1500 you have a camera that really covers all bases.

If that's not enough, the SABER IP20x is able to capture 1080p60 video over IP and support H.264, H.265 encoding. This camera also supports Power over Ethernet (PoE) and various protocols such as Standard IP Visca, Serial Visca, Pelco-P/D control; IP Visca over TCP/UDP.
