

eLOOP BY OPUS TECHNOLOGIES

BRINGING THE MAGNETIC INDUCTION LOOP TO A NEW ERA

E-LOOP is the latest generation of Opus TECHNOLOGIES counter loop amplifier. Developed internally by our in-house engineers, e-loop is the result of years of research and expertise in the field of hearing accessibility. Design, compact and powerful it is designed to integrate perfectly in modern and refined environments. It will allow hearing-impaired people equipped with hearing aids to receive an audio signal directly into their devices.

The system incorporates a battery to ensure autonomous operation for 4 hours.

Available in 2019, certainly e-LOOP will sets a new standard.
