

BICOM EZ-TOK INTERCOM

SMALL SIZE, SMALL PRICE, HIGH QUALITY OF COMMUNICATIONS

Through its Audiofils distribution subsidiary, Opus Technology is proud to present in Europe the new generation of autonomous Full Duplex Digital Intercoms.

Less expensive and easier to implement, Bicom EZ-TOK is the solution for all communication needs in fields as varied as the entertainment industry, broadcast, events, sport or security.

Up to 500m range and 10 hours of autonomy, this flexible system allows up to 6 people to communicate in real time and in full duplex.

Many features are available such as adjusting the sensitivity of the microphone or the presence of a noise filter to optimize the quality of communication in a noisy environment.

Available individually or in kits of 2 to 6 units including transmitter / receiver, multiple charger, professional monaural headset and waterproof case.

Come and see a demonstration on our booth number 7-V245
