

# E-LOOP BY OPUS TECHNOLOGIES

## BRINGING THE MAGNETIC INDUCTION LOOP TO A NEW ERA

e-LOOP is the new flagship product of Opus Technologies loop amplifier. Developed in intern by our engineers, e-loop is the result of our research and development policy across the hearing accessibility market. Sophisticate, compact and powerful, e-LOOP is designed to be perfectly integrated in various environments. It allows to impaired people equipped with hearing aids to receive an audio signal directly into their devices.

Available in 2020, certainly e-LOOP will set a new norm.

Come and see our whole range of products on our booth 1-N138.
