### **Murideo Introduces the SEVEN Generator, a Dolby Approved Test Device**

*New from Murideo, the SEVEN Generator, a Dolby Approved Test Device, is unlike any other with extensive audio and video testing capabilities.*

Murideo is proud to present the SEVEN Generator, the next generation in HDMI test and measurement equipment. A Dolby® approved Test Device, the SEVEN hosts an unmatched suite of audio and video tests ideal for the video device, display, or repeater manufacturer as well as the consummate video professional.

Murideo is responsible for the SIX-A Analyzer and DPL Labs certified SIX-G Generator Field Test Suite. Popular among the world's top integrators and calibrators, the success of these products paved the way for the development of the Seven Generator. The impressive video capabilities of the SEVEN include native 10/12 Bit BT2020 video output with over 1000 patterns, including HDR, SDR, Dolby Vision, and HLG. Test patterns are generated from FPGA or raw YUV files for a truly native experience and include video playback. The SEVEN includes the full suite of patterns from Diversified Video Solutions and other patterns and videos from Bill Wetzel, ISF, PVA, Portrait Displays, and Spears & Munsil. This device is the ideal solution for display calibration and evaluation. The test suite allows the user to construct a test signal with any video format and any audio format, then execute a test based on your own parameters and allows for reporting. The SEVEN has 1.5TB of storage, with reservations for up to 3 minutes of 4K60 4:4:4 video playback so the user can quickly load patterns using the USB 3.0 interface and is capable of 120 frame video playback.

The impeccable performance in video generation is just the beginning. The SEVEN was designed with advanced audio testing capabilities, including A/V Sync (Lip Sync), Audio Latency, and Dolby Audio. This Dolby approved test device contains all current Dolby Audio streams, including; Dolby Digital, Dolby Digital Plus (w/Dolby Atmos), Dolby MAT (Dolby Atmos), and Dolby True HD (w/ Dolby Atmos). The Audio Suite of tests is available in HDMI Tx, ARC Tx, and eARC Tx. With additional features like tone generation, frequency sweeps, AV Sync measurements, audio latency measurements, this is an audio swiss army knife. The built-in photo-diode sensor and microphone allow you to get real-time sync and latency measurements from HDMI and ARC/eARC.

For more information or to purchase the SEVEN Generator, please contact Murideo at 877-886-5112 or visit [www.Murideo.com/Seven-G](http://www.Murideo.com/Seven-G).

### **About Murideo**

Murideo, an AVPro Global Holdings brand, was created to satisfy the need for modern testing tools in the custom A/V market. Through a depth of knowledge brought on from years of experience in the electronics industry, the team at Murideo has brought cutting edge testing equipment to the world that were previously only available to the elite. The philosophy of Murideo is simple, focus on technology, focus on design, and focus on our users. For more information visit [www.Murideo.com](http://www.Murideo.com) or call (877) 886-5112.
