AVPro Edge Offers Full Conference Room System Solution with ConferX Line
With the addition of two new multi-format matrix switchers, AVPro Edge anchors their full conference room system/classroom solution.

AVPro is excited to announce the launch of the AC-CX42-AUHD and AC-CX62-AUHD, two new 18Gbps HDMI conference room/classroom matrix switchers. These products work seamlessly alongside any of the existing ConferX solutions to create a custom installation.

Simple, intuitive and automatic control make these units the ideal "in-room" matrix switchers. The "Auto" option which defaults to the last plugged-in device and simple one button control for each output makes presenting easier for teachers, professors and business professionals. Each switch can display any of the four (CX42) or six (CX62) sources through both the HDBaseT and HDMI output port. Each of the outputs are independent of each other allowing two sources to be shown at the same time. In addition, the audio inputs and outputs work with microphone or intercom systems. All of these features make the AC-CX42-AUHD and AC-CX62-AUHD ideal for classroom, conference room and huddle room environments.

These switches anchor the entire ConferX line-up. Their HDBaseT inputs are compatible with all of the wall plate transmitters including Mini DisplayPort, VGA, HDMI and the new USB-C version – ideal for screen sharing with the 2019 MacBook series and other computers that only offer a USB-C output for video. The ConferX Universal Amplifier can also be used as the receiver for the HDBaseT input. This allows the integrator to connect speakers and/or the room projector to the AC-CX100-RAMP and amplify sound while controlling the system via one of the switchers.

AVPro's Jeff Murray stated, "I've been in hundreds of conference rooms and classrooms in my life, nothing halts a meeting quicker than having issues with the equipment in the room and in turn, getting the presentation on screen. With ConferX solutions, integrators can set up the room with confidence knowing the end user won't have a problem sharing with their brand new laptop or tablet and each meeting/class will run smoothly."
