Dedicated Digital Signage OEM, Allsee Technologies, will be showcasing a range of new Digital Signage solutions when it exhibits at the world's largest AV and systems integrators event, Integrated Systems Europe from the 5th to 8th February 2019 in Amsterdam. With its largest stand ever at ISE in Hall 8 stand 8-C166 Allsee is taking the opportunity to reveal several new unlaunched products alongside our Queen's Award-winning core product ranges.

Digital Android Battery A-Boards – Stand out from the crowd with this innovative portable Digital Signage solution. After showing an early prototype at ISE 2018 we return with an updated product following feedback. With an integrated lithium-polymer battery this product revolutionises the way Digital Signage can be used. With 12 hours running time, a high brightness IPS panel and stylish white enclosure this product has it all opens up a whole new world of possibilities

Ultra Wide Stretched Displays – See Digital Signage in a whole new way with our unique stretched format displays. With a narrow bezel and Android Media Player these special displays are perfect for applications such as wayfinding and retail use. Thanks to their commercial grade 24/7 panel these displays can be used in portrait and landscape orientations. Meaning they are perfect for tall or narrow locations.

LCD Shelf Edge Displays – Transform lifeless shelf edge signage with these new revolutionary LCD displays. Their ultra-wide aspect ratio is perfect for integration into existing shelf edge systems. Compliment printed signage by adding motion and vibrancy. With easy mounting and syncing across multiple displays you can transform retail shelving units.

Digital Rod Displays – Seize the benefits with dynamic LCD digital light pockets. Perfect for estate agents these innovative displays are powered via the rods they are mounted to for a clean installation. With a brightness of 1,000 cd/m² these screens are much brighter than dull and static printed signage.

Hanging Double-Sided Window Displays – Grab the attention of onlookers with this Double Sided Window Display. The outward facing side has a brightness of 700 cd/m² to entice passers-by. Once inside you can use the inward facing side with a brightness of 450 cd/m² to reinforce your message further. With a super slim design, integrated ceiling mount and ultra resistant to blackening IPS panels this is the ultimate Digital 360° window display.

We will have these products on stand 8-C166 in Hall 8, we welcome you to come to the stand and see the new solutions for yourself.

About Allsee Technologies

Allsee Technologies is based in Birmingham, United Kingdom. Founded in 2007 Allsee has quickly developed into market leading Digital Advertising Display Manufacturer with an impressive Blue Chip client portfolio. To meet the demand of our global distribution network of resellers, our factory in China has the capability to produce 2,000 displays every day, ranging from digital advertising displays, freestanding digital posters and touch screens to seamless video wall displays. Our success has been driven by our focus on delivering supreme quality, market leading customer service and unparalleled industry expertise. We are the only manufacturer committed to simplifying the emerging technology of Digital Signage for our customers.
