---

**Date:** 8<sup>th</sup> January 2020

**PR Contact:** Thomas Fraser-Bacon (Marketing Director)

**Email:** [thomas.fraser-bacon@allsee-tech.com](mailto:thomas.fraser-bacon@allsee-tech.com)

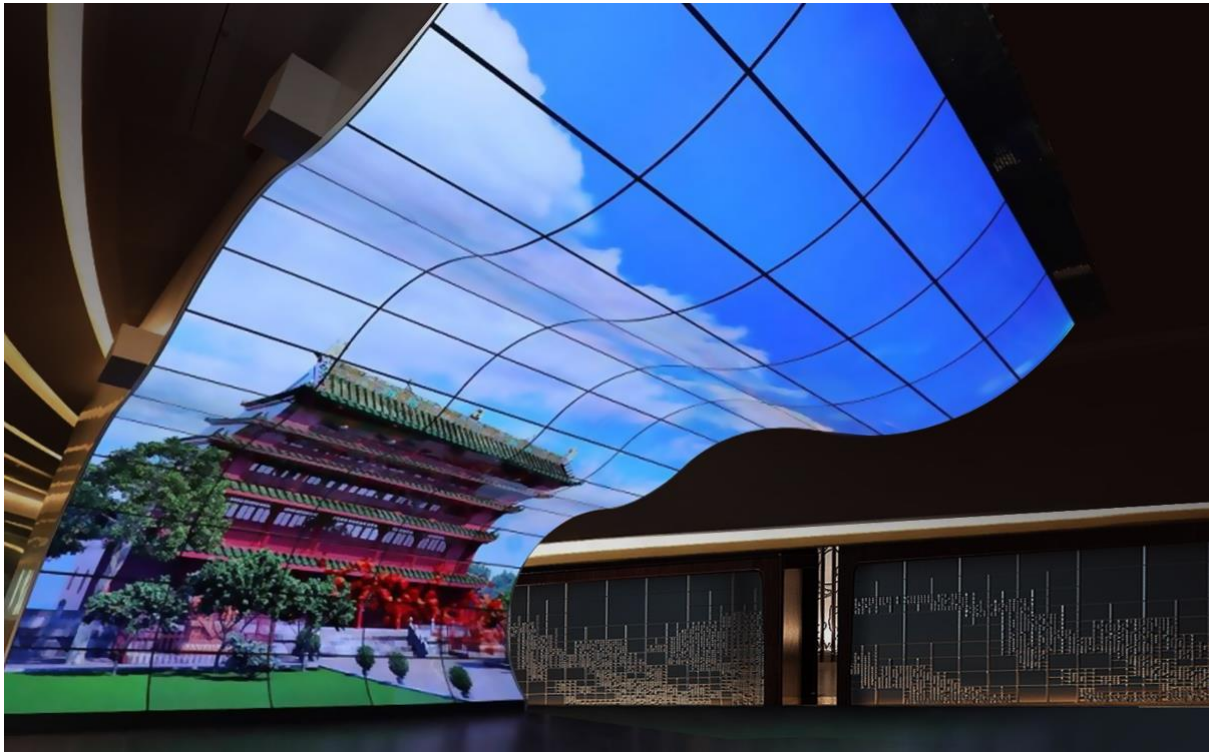

**Stand:** 8-C160

Following the launch of a wide array of innovative new products in 2019, including our Indoor Battery Powered Digital A-Board, our Super-Slim Hanging Double-Sided Displays for windows and our Low-Voltage Rod Powered Displays, we are proud to announce that we will be previewing a number of new solutions scheduled to launch later in 2020.

**Outdoor Digital Android Battery A-Board** – Following the remarkable reception after the launch of our indoor version, we will be showcasing an IP65 rated outdoor version at ISE 2020. With an integrated lithium-polymer battery this product revolutionises the way Digital Signage can be used. With 12 hours running time, a high brightness IPS panel and stylish white enclosure this product has it all opens up a whole new world of possibilities

**Curved OLED Video Wall Displays** – We are proud to be at the forefront of the OLED revolution within the commercial display market. Create curved video walls with a radius as low as 1 metre in both horizontal and vertical axes. Super-thin 3mm profile depth and self-illuminating OLED panels that produce vibrant colour on perfect black.

**Ultra Wide Stretched Displays** – See Digital Signage in a whole new way with our unique stretched format displays. With a narrow bezel and Android Media Player these special displays are perfect for applications such as wayfinding and retail use. Thanks to their commercial grade 24/7 panel these displays can be used in portrait and landscape orientations. Meaning they are perfect for tall or narrow locations.

**LCD Shelf Edge Displays** – Transform lifeless shelf edge signage with these new revolutionary LCD displays. Their ultra-wide aspect ratio is perfect for integration into existing shelf edge systems. Compliment printed signage by adding motion and vibrancy. With easy mounting and syncing across multiple displays you can transform retail shelving units.

Please visit our stand in Hall 8 (8-C160) to check out these revolutionary new solutions. For more information email [marketing@allsee-tech.com](mailto:marketing@allsee-tech.com) or give us a call on +44 (0)121 421 4458.

### **About Allsee Technologies**

Allsee Technologies have offices and warehouse facilities in Birmingham, United Kingdom as well as Oostende, Belgium. Founded in 2007 Allsee has quickly developed into market leading Digital Advertising Display Manufacturer with an impressive Blue Chip client portfolio. To meet the demand of our global distribution network of partners, our factory in China has the capability to produce 2,000 displays every day, ranging from digital advertising displays, freestanding digital posters and touch screens to LCD and LED video wall displays. Our success has been driven by our focus on delivering supreme quality, market leading customer service and unparalleled industry expertise. We are the only manufacturer committed to simplifying the emerging technology of Digital Signage for our customers.
