

FOR IMMEDIATE RELEASE

**PLIANT® TECHNOLOGIES SHOWCASES LATEST MICROCOM®
WIRELESS INTERCOM SOLUTIONS AT ISE 2020**

*The Company's Enhanced SmartBoom Headsets and Latest Accessory Offerings
Will Also be on Display*

AMSTERDAM, JANUARY 21, 2019 — [Pliant Technologies](http://www.plianttechnologies.com) will feature its latest digital wireless intercom systems, MicroCom M and MicroCom XR, at ISE 2020 (Booth 7-V229). The newly released MicroCom systems offer a simple to operate and affordable intercom solution where solid wireless performance is required. Available in 2.4GHz and 900MHz (where legal), MicroCom M and MicroCom XR provide full-duplex, multi-user intercom for applications where high-quality audio, excellent range, and low-cost are essential.

MicroCom M is an economical single channel system that features a 10-hour lithium ion battery operation and has the ability to have up to five full-duplex users. MicroCom M is compact and water-resistant and provides quality communications at a very attractive price point. MicroCom XR is a robust two-channel intercom system that provides extended range and a 15-hour (field-replaceable) battery, as well as the ability to have up to 10 full-duplex users. MicroCom XR features an easy-to-read OLED display, and an optional I/O feature for connection to existing intercom systems, drop-in charger and is IP67-rated. Both of these lightweight belt packs are built to endure the wear and tear of everyday use. Additionally, both the M and XR versions feature the capability to provide unlimited listeners in addition to duplex users, all without the need for a basestation, providing flexibility for a range of applications

“At ISE 2020, alongside the latest CrewCom system, we are excited to showcase our new digital intercom solutions, MicroCom M and MicroCom XR, to AV and system integration professionals,” says Gary Rosen, Vice President of global sales for Pliant Technologies. “The MicroCom system has already generated a great deal of interest in the market. We can now provide solutions for even modest wireless intercom applications and budgets, and serve the needs of customers that have been looking for an intercom solution with the quality, features, and price of MicroCom M and MicroCom XR.”

Also being displayed at ISE, will be the company's wide variety of professional SmartBoom headsets, which has now been expanded to include versions for use with MicroCom M and MicroCom XR belt packs. Pliant's enhanced line of communications headsets, including its recently updated SmartBoom LITE and SmartBoom PRO headsets, incorporates a convenient flip up microphone muting feature and are specifically designed for exceptional comfort, flexibility, and durability as needed in the most demanding professional environments.

Pliant will also be showcasing its latest CrewCom accessory offerings including its new Drop-in Charger, and FleXLR, an XLR headset adapter. The addition of a new compact FleXLR adapter gives users the flexibility to connect headsets to devices with non-matching 4- and 5-pin XLRs. This innovative solution can be used with any professional intercom systems—allowing customers to use existing headsets without bulky cable adapters. The new Drop-in Charger (PBT-RPC-66) allows six Radio Packs (RPs) plus six additional batteries to charge in the same device simultaneously for more effective battery management.
