

February 2019

Phonak is pleased to present its complete portfolio of communication solutions: from tour guiding solutions to a wide range of transmitters and in-ear receivers, barrier-free applications and broadcasting.

Discover Phonak's unique Roger technology, the latest digital standard operating on the license-free 2.4 GHz band. Roger systems are ideal for people working in broadcasting and show business, who rely on seamless communication with directors, producers, and sound technicians. They are utterly discreet, easy to use and install, and offer unrivalled intelligibility.

The wireless Roger communication system, includes a virtually invisible receiver that is hidden in the listener's comfortable, tiny earpiece, along with a transmitter and advanced microphone.

Discover the only wireless in-ear prompter to combine absolute discretion with unmatched digital audio quality. Only Phonak's new Roger technology can give studio professionals an earpiece so tiny, a setup so easy, and audio so clear that using it will feel like magic.

Since 1992 Phonak Communications has helped professionals to communicate effectively in challenging environments. Thanks to our close collaborations with end users to develop perfectly tailored solutions, our miniaturized wireless earpieces, headsets and professional hearing protection devices are used and trusted by demanding customers around the world. Based in Murten, Switzerland, Phonak Communications is a member of Sonova Group, the world's leading hearing healthcare company.

Come to visit us at ISE 2019, Stand K175 – Hall 14.
