Crowdbeamer ProAV:
The ultimate presentation system for conferences and events

Edegem (Belgium) – February 7 - Crowdbeamer is the first presentation system that streams any screen content wirelessly to all portable devices, whatever the meeting environment. Enabling everybody in the audience to capture what they see, complete it with notes and share with others, crowdbeamer helps presenters create long-term impact with their message.
Crowdbeamer ProAV is well suited to build a network of crowdbeamers, serving larger conference rooms. So, presenters can now even reach out to an audience of any size.

Crowdbeamer exhibits at ISE, Amsterdam. Visit us at booth R15-260 to see crowdbeamer, and discover its countless applications for corporate, government, education, as well as staging and rental.

New release in 2019

Within the crowdbeamer portfolio, crowdbeamer ProAV is the product that serves the needs of conference and event organizers.

Crowdbeamer ProAV is a ruggedized device that

- can be **securely suspended** to a stage truss,
- can easily cover any indoor or outdoor space by **daisy-chaining** a series of devices,
- supports 500+ simultaneously connected client devices,
- will run **all new features** that will be released as future firmware updates or feature packs,
- comes with **access to free support & firmware updates** during the warranty period.

Using a network of new **crowdbeamer ProAV** devices, conference keynote speakers can now share in real time with each participant in an audience of 500+. All that is needed is to connect the master crowdbeamer HDMI to the event AV system. Crowdbeamer ProAV's built-in WiFi then provides all conference participants with instant access to any screen content shared by speakers, whatever the complexity of the conference space layout.

Crowdbeamer ProAV's **multiple powering and networking options** (including PoE) deliver the flexibility, reliability, and scalability that professional AV companies are looking for. They can now provide live content sharing solutions that meet the needs of even the most demanding conference and event organizers.

About crowdbeamer
Crowdbeamer is developed by RORYCO, a Belgian company founded with the mission to market easy to use solutions for all professionals who are involved in presenting information to a live audience.
