Sonifex Show Multi-Channel Dante® Audio Interfaces at ISE 2019

AVN-AIO4 4 Input, 4 Output Dante® Interface, PoE

AVN-AIO8 8 Input, 8 Output Dante® Interface, PoE

At the end of last year Sonifex announced new Dante commentary units, which will be available in March 2019. At **ISE stand 10-K167** Sonifex is launching its Multi-Channel Dante® Audio Interfaces, which are Dante Domain Manager compliant.

The **Multi-Channel Dante® Audio Interfaces** consist of the **AVN-AIO4** and **AVN-AIO8**, which provide 4 and 8 respectively balanced analogue inputs and outputs to and from the Dante network. Simple to configure and operate, these cost effective rack-mount solutions offer an easy solution for AV professionals and system integrators. Packaged in a 1U form factor, they use Neutrik XLR connectors, are Dante® AES67 compliant and use PoE for power.
