

## HELGI Carts & Stand for IFPs and LFDs - Manual, motorized, wall mounted or mobile cart

### ISE 2020 – HELGI presents its range of carts & stands for IFPs Stand: 5-V50

At HELGI's stand it is possible to discover the wide range of carts & stands for interactive flat panels and large format displays.

The **motorised carts** consist in carts with electrical up & down movement, available with manual tilting option to create an interactive table, suitable for LFDs up to 75", 86", 95" depending upon the model.

The **single column** are manual carts with up&down movement (with or without crank) with 90° rotation feature to work in landscape/portrait mode, suitable for LFDs up to 70".

The **double column** are manual carts with up-&down movement (with or without crank) provided with laptop and webcam / PTZ camera shelves, suitable for LFDs up to 100".

And finally, the **wall stands**: sleek, elegant wall stands with electrical or manual up&down movement, suitable for LFDs up to 75", 86", 95" depending upon the model.

### New HLGFS16 support

HELGI presents the revolutionary floor support with wall mounting for **displays up to 86"** and weight up to 90kg.

The sturdy steel base is adjustable between **110-170 cm** in height **from the ground** with respect to the center of the display through a special handle, in order to facilitate the vision for both a passing and seated audience.

The strong yet flexible anchoring makes it ideal **for weak or plasterboard walls**, typical of today's dynamic business environments.

The support allows a horizontal orientation of the display and is equipped with a quick-release display system that ensures an **easy post-installation**. Furthermore, HLGFS16 has an **orderly cable management system**.
