

NorthVision and EET Group announce strategic partnership

Vancouver, September 20, 2019: NorthVision Technology Inc. and EET Group are pleased to announce that they have formed a strategic pan-European partnership whereby NorthVision wireless presentation systems (VisionShare) will be distributed in France, Italy, the Nordics, the Baltics and Eastern Europe by EET Group.

VisionShare is an instant plug and play wireless presentation system that uses HDMI wireless connectivity. Software installation is not required and system compatibility issues do not occur. Moreover, VisionShare adopts the newest 60 GHz technology to provide faster speed, larger bandwidth and TRUE 4K connections with zero latency. NorthVision was awarded the best new wireless product of ISE 2018 and was named a silver winner of the 12th IDA (International Design Awards) in the category office equipment (productivity tools/presentations)!

EET Group, as a value added distributor, is committed to provide cutting-edge products to its customers in the field of wireless presentation systems. Hence, this strategic partnership is a natural one given the key differentiating factors offered by VisionShare and the strong commitment of EET Group to provide the best solutions to its customers.

Emmanuel Herbreteau, European Business Development Director at NorthVision comments *“This partnership is exciting for both organizations. It combines our highly innovative solution with a value added distributor that brings a huge experience and expertise in the AV and IT sector serving thousands of customers all over Europe”*.

Henrik Breda, EMEA Director Pro AV & Digital Signage at EET comments *“I’m excited for this new business cooperation between two state of the art companies. NorthVision creates easy to use, plug&play, high performing wireless presentation solutions that fit perfectly into the excellent sales and distribution setup EET can provide to all our partners across Europe”*.
