NorthVision is introducing a wide range of accessories for VisionShare

NorthVision is a leading collaborative solution provider, focus on designing the next generation technology that connects our lifestyles and workspace. VisionShare is not just a product, but also design the best balance between user-friendly and advance technology. This solution will present at ISE 2020 with the aim to create smartest work and education environment you have ever experienced before.

NorthVision has developed a wide range of accessories (see list hereunder) for VisionShare wireless collaboration products. By offering a large selection of accessories NorthVision is providing even more flexibility for meeting room equipment or meeting room upgrade. All those products come with a stylish and elegant design for a seamless integration in any smart office environment.

VisionShare is an instant plug and play wireless presentation system that uses HDMI & USB-C wireless connectivity. VisionShare also adopts the newest technology to present faster speed and larger bandwidth to support TRUE 4K connections with near zero latency. No compression needed to present the best quality video performance ever. You see what you broadcast.

With Headquarters in Vancouver, Canada, sales offices in the US and Singapore, NorthVision is now expanding in Europe through a network of distributors in Germany, Belgium, Netherlands, Denmark, Finland, Switzerland and Turkey. The objective is to have a global distribution coverage for Europe by the end of 2020 to deliver collaborative solutions that facilitate a much better way of working and learning.

The advertisement features a black background on the left with the NorthVision logo and product name. Below this, there are images of NorthVision hardware: a laptop dock, a smartphone, a tablet, and a USB dongle. On the right, a yellow banner contains the event information. The background of the banner shows a man pointing at a large multi-touch display in a meeting room.

About NorthVision

NorthVision has reached new levels of productivity with wireless content sharing, enabling such devices as laptops, tablets, and smartphones to wirelessly and instantly establish a display connection. With new technology and advanced knowledge in various areas, our core competency is to develop a completed collaboration system through product innovation, creation, and motivation.
