

Smarter Retail

Manufacturer: JWIPC

Stand: 8-S285

Matching the retail industry's need for more intelligent and diversified development trends, JWIPC will release the new K- and M-series retail PC boxes at ISE 2019.

With dual LAN and multiple serial ports, the K-series meets the need of the retail self-service equipment industry. Addressing small businesses, and retail point-of-sale main points with flexible configuration options, and the need for a cost-effective solution.

K-series

The M-series retail PC box support full HD and UHD resolution, along with Intel Movidius VPU AI module for face recognition and data analysis. Playing high-definition video to attract customers' attention, alongside collecting and analyzing customers data, in order to create more intelligent and personalized retail management systems.

M-series

As a large ODM manufacturer, JWIPC has always adhered to the "For a smarter world" guideline in order to provide end-to-end hardware solutions for our customers world-wide.
