

ANY, Black Nova's All-in-One New Touch Panel

Black Nova proudly launches its most design and innovative product, ANY, the evolution of current touch panels in terms of design, technology and overall user interface that fully embrace the IOT and AI universe.

ANY takes personalization to a whole new level and deliver an unparalleled user experience with full touch surface, gestures and automated scenes triggering.

ANY can control any smart device around you, for instance, light, blinds, air conditioning, audio video and security while its bold design and customization capabilities make its blending nicely in any design style and context.

Come and experience ANY at our booth at ISE, words are just not enough to describe and explain it properly.
