

ALBA, a Classic Design Reinvented

Black Nova® proudly announces ALBA®, its unique and stylish interpretation of modern keypads.

ALBA is the evolution of current keypads in terms of design, material combination and overall user experience.

ALBA has a bold design and unique material combination that makes it the perfect match for any space, style and context.

Large, easy-to-use buttons with engraved icons and texts. Faceplates and buttons are flush to each other, creating a perfectly smooth surface. A subtle click confirms user touch.

ALBA is available in 2, 4 and 8 buttons layouts and two stunning finishes, metal and glass.

Come and experience ALBA at our booth at ISE 9-F120.
