

Case Study: VISSONIC CLASSIC-D conference system - in the Administration of the Solnechnogorsk District
2019-10-29

VISSONIC CLASSIC-D discussion and conference system was selected into two meeting rooms of the Administration of the city district of Solnechnogorsk.

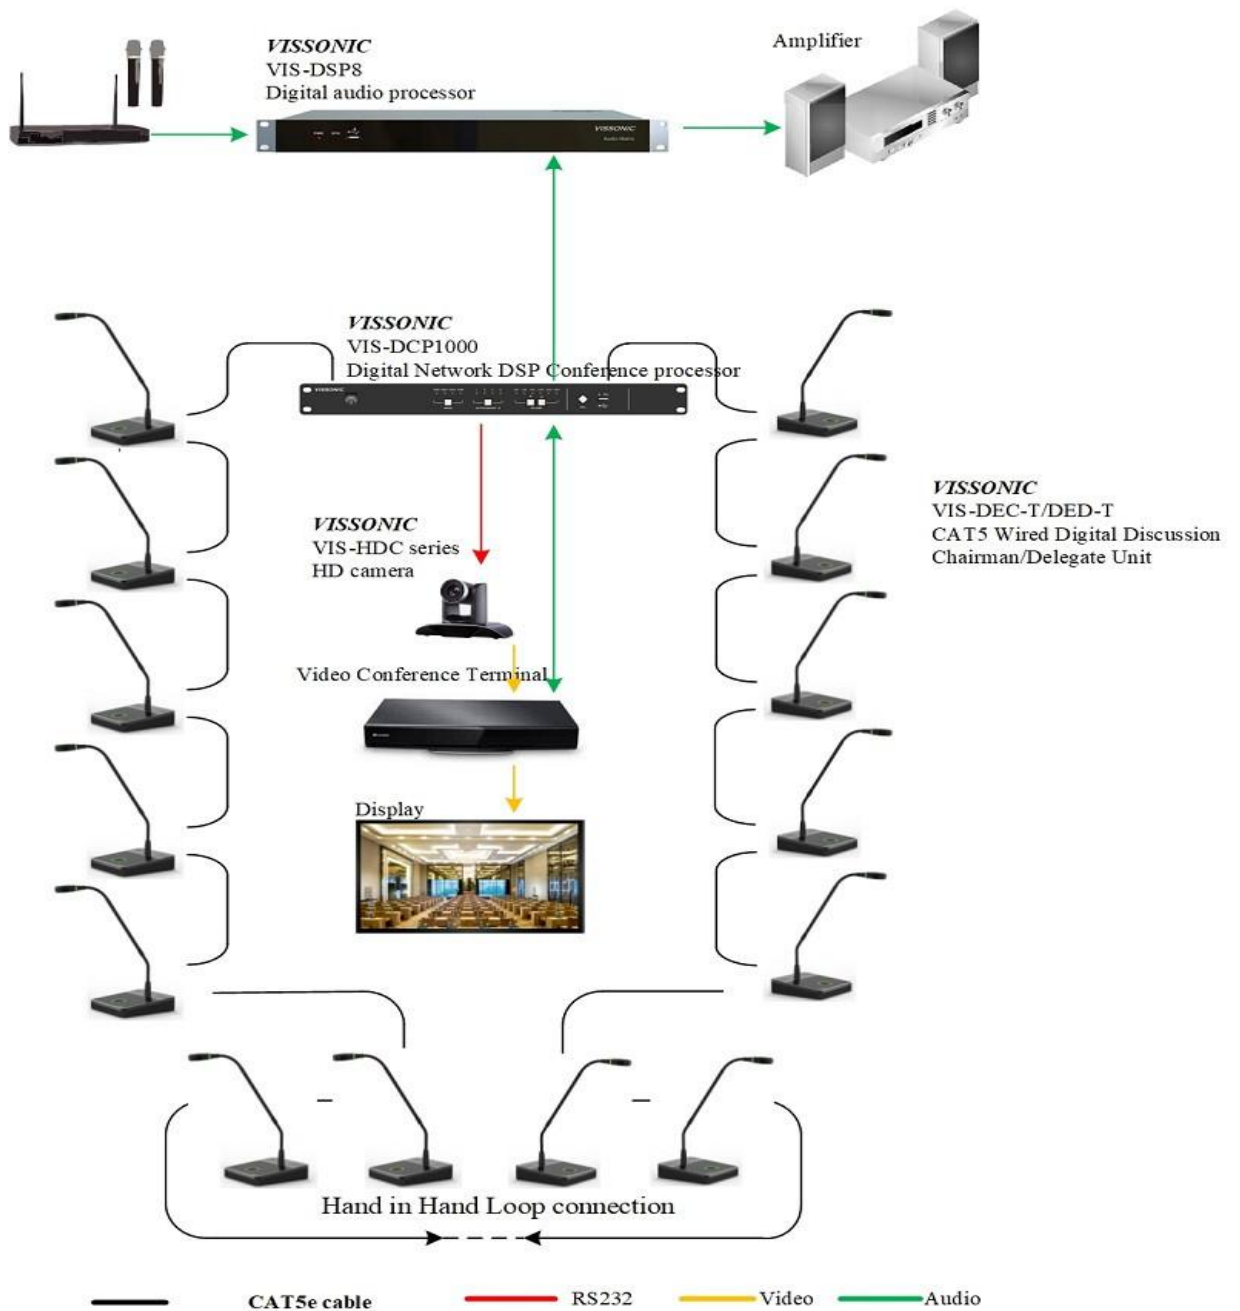

Since the halls are small, and voting is carried out by a simple show of hands, Our client decide to use only a discussion system, without additional functions. The choice fell on the , which is not VISSONIC CLASSIC-D surprising. Stylish and strict lines of remotes, perfect for a bright countertop in the hall. Directly from the box, automatic camera guidance is supported. In addition, the system is connected with a twisted pair cable ,which means that it can be easily and very inexpensively replaced if necessary.

A total of 20 consoles were delivered, of which 1 was the chairman VIS-DEC-T for the head and 19 delegate consoles VIS-DED-T .Now the VISSONIC CLASSIC-D conference system helps the Administration of the city district of Solnechnogorsk in a fruitful, daily mode to discuss current issues.

The CLASSIC-D series of full-digital network classic conference system, based on network technology, simple conference, classic design.

The classic conference microphone which is fully simplified in terms of the functions of the system, making it easy for customers to operate and use, to meet the requirements of most customers for the conference system
