Powering Connected Graphics, Sodaclick, launching at ISE 2019

Create & Update Dynamic Digital Signage Content From Any Device!

London, UK – (December 20, 2018) – Sodaclick Ltd. a new contender in the digital signage market, will be debuting its much anticipated cloud based SaaS for dynamic content creation at the ISE 2019 in Amsterdam. Sodaclick aims to perfectly compliment users existing digital signage systems by offering a free for life content creation subscription, along with higher end, affordable packages that are geared towards customers screen requirements. Through the app, users create and output 4K slides with animation as HTML5 web links for their screens, easily, and securely. Sodaclick have a large template gallery which is ever increasing, covering many categories, and fully editable in both graphics and text only modes. Whether a digital poster promotion for retail, or a digital menu for a global fast food chain, Sodaclick caters for all businesses and helps deliver on your brands message.

With no hidden charges, Sodaclick offer a simple, all inclusive content creator with royalty free assets for creating high quality digital signage content. Slides are both dynamic and infinitely editable with automatic content updates. This means users never have to touch their CMS and its playlists, making for more of a frictionless process.

Coming to market with big plans for 2019 and an appetite for innovation, Sodaclick look to integrate and partner with like minded companies in the coming months, which will help offer customers greater value add to their digital signage systems.

Visit Sodaclick at the ISE, booth 8-S274, for an interactive, hands on experience, or visit sodaclick.com for more information.
