

## Press Release

Feb-04-2019

### **PureLink GmbH: World's first Rugged 10G Network Switch The IPAV Pro 10G-8X8F - Rugged PureLink Chassis, Netgear® Core Technology**

Riding on the success of The IPAV Pro series of 10G rugged SDVoE products, PureLink now brings a 10G Network switch that can not only handle the 10GBASET data load required by SDVoE, but also has the professional connections you expect.

Working in partnership with Netgear, Purelink has stripped away the commercial components of Netgear's 4300 series leaving only the fundamental core components, and then encased them in a solid tour-ready chassis.

Fully equipped with a range of professional standard connection standards - EtherCON CAT6a, opticalCON DUO and FiberFox EBC1502 – the IPAV10G-8X8F can handle any situation you can throw at it, while retaining the powerful networking features from Netgear.

The delivery of professional standard uncompressed video over 10 Gigabit Ethernet plus audio and control has never been easier. Using the zero touch approach, absolutely no setup is required – a true plug and play experience when used with the IPAV Pro range of transmitters and receivers.

The IPAV10G-8X8F makes professional AV/IT convergence a reality.

## The IPA V Pro 10G-8X8F at a Glance

World's First Rugged 10G Network Switch

- First rugged 10G Network switch ever
- Eight Neutrik® EtherCon CAT6a Connectors
- Eight Neutrik® opticalCON DUO Connectors
- Optionally Eight FiberFox® Connectors
- HDMI 2.0 and SDVoE Signal Transmission
- Zero Touch AV-over-IP with pre-configured L2 Multicast (SDVoE-ready)
- Uncompressed AV signal transmission at max. 4K 60fps with HDR, zero-frame latency
- PoE+ (30 watts per port), hot swap, redundant power supplies, full provisioning
- Vertical or horizontal flexible stacking with management unit hitless failover and nonstop forwarding (NSF) across operational stack members
- Stacking and distributed link aggregation allow for multi-resiliency with zero downtime and load balancing capabilities
- Innovative mixed "Spine and Leaf", 1G, 10G and 40G stacking with nonstop forwarding (NSF) and hitless failover redundancy

IPA V Pro 10G-8X8F

## About OneAV

OneAV is the first and fast-growing pan-European specialist technology distributor of AV connectivity brands, supplying professional installers in residential and commercial markets. With offices, training and fulfilment centres in Germany, the Netherlands and the UK, OneAV provides localized marketing, education, and support for all stocked brands.

OneAV prides itself on being able to provide the highest quality solutions for any AV project, backed up with first-class technical knowledge and support that only a focused connectivity specialist can offer.

## Company Information

PureLink GmbH develops, produces and markets products for professional presentation and media technology.

Since 2006 PureLink has been one of the international branch leaders for digital connectivity solutions, e.g. HDMI cables and adapters, wireless HD, or optical glass fiber products.

As manufacturer and distributor, PureLink is partner of wholesalers, mail order companies, industry, electronics stores, and installers. The product portfolio comprises consumer equipment, as well as individual customer solutions. Professional products from leading international manufacturers complete the wide range of own-brand products.

The company's distribution and logistics centre is located at Rheine, Germany.
