

# An AOPEN view

Introducing at ISE 2020

It's hard to imagine a world without screens all-around in today's life, where they even reside in your pocket. They now play an important role in retail, healthcare, hospitality, and well, pretty much everywhere. Then again, digital signage does capture 400% more views than static displays!\* AOPEN already offers multiple screen devices managing 3, 4 or even 6 screens. On top of this, in 2020, we are offering a device that can handle 9 screens at once!

Aside from the video wall, extension AOPEN is developing in the industrial field. Industrial hardware devices for industrial conditions and making sure they can withstand even rougher surroundings, differentiating temperatures, and have suitable I/O ports, primarily for industrial use.

\*Based on Intel Corporation: A report on a field of anonymous video analytics (AVA) in digital signage
