

# CASE STUDIES

## Doha Media - Media management

Doha - Qatar

AOPEN device: EC650 & DE7400

Collaborating with AOPEN, Doha media implemented digital signage on one of the largest malls in the country of Qatar: Tawar Mall. AOPEN's durable hardware makes the managing of the enormous led screens a reliable solution.

## Lekkerrr - Restaurant

Amersfoort - The Netherlands

AOPEN device: Chromebox commercial

Ordering food via a screen has become more common. Bigger franchisers implemented similar solutions years ago, but what about the smaller entrepreneur? Lekkerrr wanted to do just that, but better! And so a collab occurred between AOPEN (hardware), Next to Food system integrator) and De Digitale (software and content)

## Enseirb Matmea - Engineering school

Talence - France

AOPEN device: Chromebox mini

Being an engineering school Enseirb Matmea wanted to be digital when it came to informing students. Using screens to give out news, messages, event details and more. For this project, AOPEN co-operated with DynamicScreen for software.
