Here INNES goes again to 2020 ISE's edition!

Rennes, France, November the 27th, 2019: INNES is very excited to participate once again to the Integrated Systems Europe exhibition, event that the company considers very important in the audiovisual scene. During this upcoming edition, INNES will be in the digital signage hall.

The team will welcome you on its booth 8-K278!

Products and solutions to be showcased:

INNES:

For the building signage, INNES will present its main software:

- ➢ SignMeeting: software for meeting room booking
- ➢ SignDoor: software for digital signage on wireless displays placed on office, cabin or room doors in a hospital
- ➢ SignWay: software for searching people and places in a 2D / 3D map that can be consulted via interactive terminals
- ➢ PlugnCast CMS: software dedicated to the management of multimedia content for displaying on a network of screens
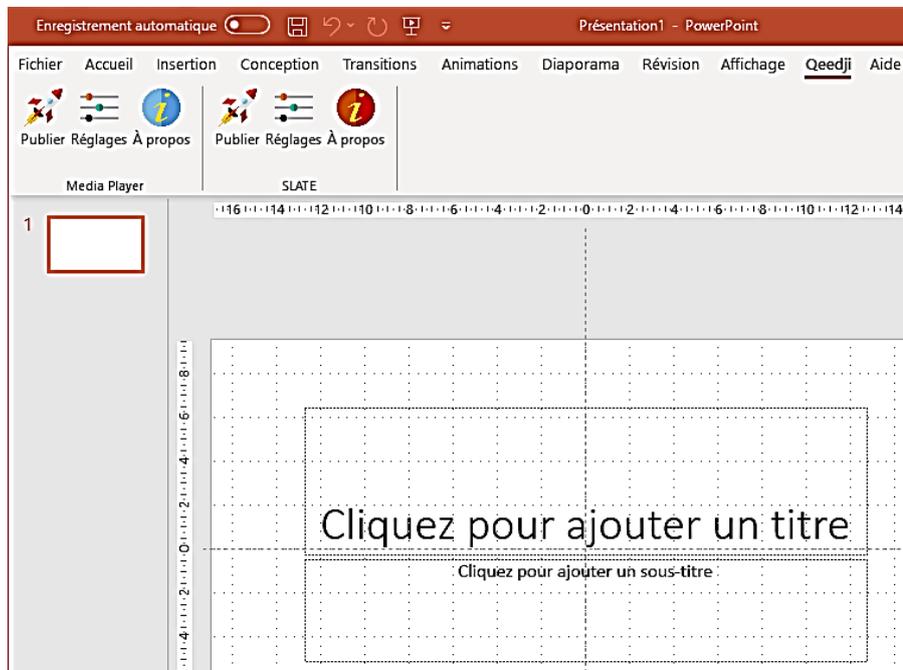

Qeedji: **brand launched by INNES in 2019 to support its entire portfolio of professional audiovisual equipment, IT and IoT**

Regarding Qeedji materials, the following will be showcased:

- ➢ Media players (SMA300 FHD, DMB400 UHD)
- ➢ The 10" screen dedicated to meeting room entrances (SMT210)
- ➢ The highly communicating e-paper (SLATE106)
- ➢ The WPAN Bluetooth Low Energy Hub, compatible with connected objects such as SLATE106 or EnOcean buttons and sensors
- ➢ The busy light device compliant with MS-Exchange

What's new?

- ❖ **PowerPoint Qeedji Add-In Publisher**: With the PowerPoint add-in, free of charge and accessible from a web download link, you can publish your slides directly to media players.

Dynamic display becomes as simple as displaying your MS-PowerPoint slideshow:

- ➢ No software to buy in addition to MS-PowerPoint
- ➢ No time wasted with video conversion. The add-in module saves the dates, times, page durations and transition effects
- ➢ High reliability of a powerful media player:
  - Automatic launch of the presentation at the start of the media player
  - Thanks to the CEC, use the screen remote control to scroll through an interactive MS-PowerPoint presentation
  - Screen saver management
  - Operation 24/7/365
  - Fanless system
  - Green technology
  - Very low power consumption (<10W)
  - 3 years warranty

❖ **SLATE106** – Digital signage

6'' electronic ink screen dedicated to digital signage.

- Android and iOS applications for inserting messages by a user on an office door
- NFC badge reader
- Built-in image editor accessible by simply connecting a computer to a SLATE106 with a USB cable
- Compatible with the WPAN SMH300 Hub. The SMH300 device connects SLATE106 displays to a corporate network and can receive a JavaScript application for example to get connected to MS-Exchange for room booking, or to a corporate directory such as LDAP / AD for names and functions of employees display on an office door
- 3 touch buttons (HID BLE)
- Autonomy of more than 3 years with 5 refreshments per day
- Very thin, 8mm thickness

❖ **SignWay** – Buildings signage

Software to install on orientation kiosks for navigating on 2D/3D buildings plans.

- 2D or 3D plan with animated arrows
- Indications of the most suitable paths according to multiple criteria (people with reduced mobility, routes clearance, etc.)
- Search for places or people in the building
- Dynamic display on the home page (web page, video, etc.)
- Multi-languages
- Customizable thanks to a configuration tool

❖ **Busy Light device**
  - Red/Green indicator
  - Communication with MS-Exchange
  - BLE5
  - POE

About INNES

INNES was founded in 2005 in Rennes city, in France, within a research pole considered as the place to be for IT and AV companies

The company has an office in Germany. Since the beginning of 2019, *INNES* launches out into the conquest of the Spanish market.

Currently, the company has more than 1800 final clients in multiple sectors.

In 2019 as well, INNES SA launched the *Qeedji* brand to support its entire portfolio of professional and IT audiovisual equipment, including media players (DMB400, SMA300, DME204), meeting room entrance screens (SMT210, SLATE106) and IoT network access points (SMH300).

As for *INNES*, it carries the software offer mainly known with the CMS PlugnCast for audiovisual communication and with the SignBuilding suite (SingMeeting, SignDoor and SignWay) for digital building signage.
