

# Crestron adds video Control Module for the Epiphan Pearl family of video encoders

January 17, 2019

Palo Alto, CA, January 17, 2019 – Epiphan Video, a leader in professional audiovisual capture, recording, and streaming products, announces the first-ever Crestron Control Module for the Pearl family of all-in-one video production systems.

The Pearl family of video switching, streaming, and recording encoders offer a network secure, 802.1x compliant video capture solution that's a great fit for corporations and institutions looking for better content security. This new Control Module makes it a lot easier for developers and system integrators to integrate Pearl encoders into Crestron systems.

"Crestron has developed a module for Pearl, which was recently made available in Crestron Labs." says David Kirk, Vice President of Marketing at Epiphan. "It includes control of recording and streaming for multiple video channels and status of all audio and video inputs. Crestron developers and integrators can now download the module and easily customize it for their specific requirements."

Integrating a Pearl encoder for secure, video content capture and delivery using a custom Crestron Control Module creates more opportunities to integrate Pearl encoders in a variety of video capture solutions – especially where a network secure, reliable, and robust video capture device is desired.

## About Epiphan Video

Epiphan Video produces world-class, award-winning audio visual solutions to capture, scale, mix, encode, stream, record and play high resolution video including 4K UHD. Our customers include companies that specialize in live event production, education, healthcare, worship, manufacturing, usability, collaboration, security and transportation.

Epiphan's field-proven product line includes live video production and video streaming systems, external USB-based video grabbers for capturing video and graphics from DVI, HDMI™, SDI and VGA sources and internal video capture cards. Our products are designed in North America and backed by rock-solid technical support.

Epiphan Video is a trade name of Epiphan Systems Inc., a privately owned company incorporated in 2003. Epiphan is based in Palo Alto, California, USA and Ottawa, Ontario, Canada with regional offices and a network of authorized channel partners and OEMs throughout the world.
