

## ***Event Series:***

### **NEW**

**Topp Pro Event 2K & 4K Premium Active Vertical Array Systems** offer a complete professional audio system solution that covers a wide range of applications. From musical groups, to DJ, to corporate events to solo performances. **Event 2K** features a very powerful 15" Active Subwoofer with 4000w (Peak) power, & a custom-tooled aluminum satellite column with 12 full-range high-definition 3.5" speakers. **Event 4K** offers even more power with a dual 15" Active Subwoofer with 8000w (Peak) power, & a wide axis custom-tooled aluminum satellite column with 24 full-range high-definition 3.5" speakers. Both systems include a very capable 4-channel built-in mixer with OLED display & very powerful DSP controls that allow their user to customize & save their own presets. Remote DSP control is possible via tablet using CSPRO iOS & Android Applications.

## ***KS HD Series:***

### **NEW**

**Topp Pro KS HD Series High-Definition Active Enclosures & Subwoofers** offer outstanding audio transparency & performance. Available in 8A, 10A, 12A, 15A, these multi-purpose premium-painted wood cabinets excel equally as, front-of-house speakers, floor monitors or permanent installations. Featuring our most reliable high-efficiency 2,000w amplifier & also taking full advantage of our newly developed KS HD DSP engine. Offering lots of headroom & strong SPL, with pristine highs, precise midrange articulation & very accurate bass response. Also featured in all these cabinets, our premium 1.75" KS HD driver, on-board 3 channel mixer with 3.5" Aux in & XLR mix out, OLED Display & powerful DSP controls, that allow the user to customized & save their own sound presets. Equally impressive our **KS HD 15A & 18A Subwoofers** offer 2000w power, KS HD DSP with multiple frequency cut settings that allows maximizing matched performance as well as adding great flexibility applicable to a wide range of applications.

## DM24Rack Digital Mixing System

NEW

**Topp Pro DM24Rack, Expandable to 48x24 i/o digital mixing system\*** (\*2 units linked) provides a capable flexible digital mixer solution that is equally well suited for live, studio, or permanent installations applications. A single DM24Rack offers 24 combo (mic/line) inputs, 12 balanced TRS outputs, main XLR outputs, master metering & headphone output. **Two DM24Racks can be linked via optional Dante cards** in true Slave/Master mode to create a 48 x 24 i/o digital mixing system. DM24Racks can be controlled wired & or wirelessly, thus offering the reliability of a wired touchscreen computer & the advantage of wireless mobility & remote control using a tablet with either iOS or Android applications. DM24Rack is controlled by our newly developed Computer GUI which is very familiar & very easy to use live. (Windows, Mac, Android, iOS Support)
