Audix introduces M63 boundary microphone to its line of installed sound products

For Immediate Release

January 31, 2019; Wilsonville, OR — Audix, a leading US manufacturer of microphones and wireless microphone systems for the stage, studio and installed sound markets announced today the addition of the M63 boundary microphone to its installed sound product offerings.

The M63 boundary microphone utilizes The Micros™ series technology hypercardioid condenser capsule that rests in an industry-exclusive, patent-pending internal shock-mount suspension system. Optimized for voice clarity and designed with logic remote or local programmable on-off switching and dual color LED status indicators, and off-set button for interference-free operation, as well as a tail-out or tail-down cable exit to accommodate a variety of installation or mounting requirements. The M63 is an excellent solution for distance learning student tables, conference and huddle room applications.

“The M63’s proprietary technology and other features are the direct result of listening carefully to our customers and working to address the challenges they face with innovative products,” said Gene Houck, Director of Sales, Audix. “It’s a philosophy that has allowed Audix to establish a loyal following in a highly competitive industry.”
