

# LUMI AUDIO Launches Wireless Audio Solutions for Multi-Room and Whole House Installations

*Finally, a wireless audio product that provides a solid choice for streaming audio in Multi-Room, Multi-Channel, Multi-User audio applications!*

The best and most affordable choice in quality sounding ceiling speakers with advanced wireless streaming capability has arrived. LUMI AUDIO introduces the WSP-6 of Wi-Fi Ceiling Speakers and FLC-6BT of Bluetooth Ceiling speakers. The new multi-room ceiling speakers provide the perfect solutions for consumers seeking the convenience of wireless audio without sacrificing audio performance and listening experience.

## MULTI-ROOM

play the same audio in different rooms

## MULTI-CHANNEL

play any audio to a single speaker

## MULTI-USER

different users control the source audio

## [WI-FI CEILING SPEAKER - WSP-6](#)

The WSP-6 incorporates the latest Class D amplifier and Wi-Fi technologies available today. The 6.5" 2-Way coaxially designed speaker delivers incredible stereo Hi-Fi sound that rivals speakers costing hundreds of dollars more. A Kevlar® Woven Cone Woofer delivers realistic lows while the Titanium tweeter reproduces highs with extreme accuracy and detail.

The versatility of the WSP-6 allows it to be used as a single source (L/R stereo) speaker or in an Active/Passive configuration by adding a secondary speaker.

Content is controlled using a free downloadable Wi-Fi music APP (available in iOS or Android) that allows music to be streamed from popular internet services or from a home network or mobile device. Users can send content to individual speakers, assign left and right channels, or group speakers together for true multi-room audio. Music continues to play even if a call is taken while streaming audio from a phone.

**PLAY/CONTROL/EXPLORE YOUR MUSIC -** Via Your Tablet or Phone

Best of all, the WSP-6 is priced to deliver sound profits for the installer/reseller. The quality sound and construction combined with versatile installation applications make the WSP-6 the perfect choice to offer today's discriminating audio buyers.

### **[BLUETOOTH CEILING SPEAKER - FLC-6BT](#)**

Similar with the configuration of WSP-6 Wi-Fi speaker, the FLC-6BT is a 2-Way Kevlar® ceiling speaker that offers Bluetooth streaming audio connectivity combined with an audio performance that pleases user's ears. The Bluetooth 4.1 advanced wireless streaming audio pairs up quickly to any Bluetooth enabled device. Perfect for bathrooms, laundry rooms, and covered patios.
